Migration, Transnationalism and Development in South-East Europe and the Black Sea Region Russell King, Maja Povrzanović Frykman, Julie Vullnetari, 2018-04-19 The Southeast Europe and Black Sea region presents fertile terrain for examining recent international migration trends The contributions to this book cover a range of examples from Ukraine and Moldova in the north to Greece and Albania in the south By intersecting the three key concepts of migration transnationalism and development they offer new insights based on original empirical research A wide range of types of migration can be observed in this region large scale emigration in many countries recent mass immigration in the case of Greece return migration internal migration internal and external forced migration irregular migration brain

Refugees, Capitalism and the British State Tom Vickers, 2016-04-08 Today in a period of economic crisis public sector cuts and escalating class struggle Marxism offers important tools for social workers and service users to understand the structures of oppression they face and devise effective means of resistance This book uses Marxism's lost insights and reinterprets them in the current context by focussing on one particular section of the international working class refugees and asylum seekers in Britain Vickers analysis demonstrates the general utility of a Marxist approach enabling an exploration of the interplay between state policies how these are experienced by their subjects and how conflicts are mediated The substantive focus of the book is twofold to analyse the material basis of the oppression of refugees in Britain by the British state and to examine the means by which the British state has managed this oppression through the cultivation of a refugee relations industry within a broader narrative of social capital building These questions demand answers if social workers and other practitioners are to successfully work with refugees and asylum seekers and this book provides these through a detailed Marxist analysis
