Truth in Serial Form Malika Maskarinec, 2023-04-27 This volume has its starting point in the veritable explosion of serialized formats in all of forms representation from painting to printing beginning in the mid nineteenth century and the well known fascination with series in biology mathematics music art or literature The new media culture of the late nineteenth century very much shaped by these serialized formats sees itself confronted with questions of truthfulness in new and profound ways just as perhaps the accelerated rhythm anonymity and broadened accessibility of new media today have created new possibilities for the dissemination of misinformation and conversely give us cause to interrogate anew our notions of truthfulness By examining both the formal operations of both aesthetic and scientific objects in a series form and the historical context of their publication or presentation the contributions in this volume examine the often strained but yet immensely productive relationship between the way in which a series negotiates questions of truthfulness both by reference to the rules established in its series form or by means of its serial format This volume provides ten detailed cases of the series form from the history of science and journalism and the history of painting photography and literature as well

emerging areas of study **Contemporary Migrant Families** Paula Pustulka, Magdalena Ślusarczyk, Justyna Struzik, 2018-10-12 Despite extensive and continuous academic interest in migrant and transnational families a stereotypical view that those leading mobile lives are somehow beyond the contours of normativity is still prevalent Such a perspective concerns both kinship and family practices of familyhood across borders and the bi or multicultural settings of providing or offering care Consequently we primarily hear about migration leading to broken relationships the dissolution of families and bonds substandard provisions of care abandonment exploitation of employees and so on In this climate of public imagination of migrants either being dangerous or concurrently stealing one's job and scrounging off the welfare state it is no small feat to be a migration scholar Trying to overcome the universalising views that essentialise human experience requires a wholly different point of departure one which is represented in this volume This is because a now well established transnational paradigm allows for a more nuanced analysis originating with the premise that not only normalises mobility but also proves that various ties and relationships can be continued in the long term despite spatial distance On the whole the transnational lens provided here showcases how new family practices are devised and deployed in mobile family lives thus allowing the argument that migration enriches certain dimensions of contemporary family life and caregiving This book plays on the dichotomy of migration as the new normal and mobility as a continuous source of challenges The core issues examined here concern such problems as maintaining kinship ties across borders new patterns of mothering and fathering children's sense of belonging and identifications and social capital and engagement in community life It reveals that doing family in the migration context often eludes simple definitions of national space or typical family Instead it offers a transnational understanding of how a person practically and pragmatically arranges one's family and kinship strategically choosing pathways of care child rearing relationships at home maintaining traditions and so forth **Blind Vision** Zaira Cattaneo, Tomaso Vecchi, 2023-12-05 An investigation of the effects of blindness and other types of visual deficit on cognitive abilities Can a blind person see The very idea seems paradoxical And yet if we conceive of seeing as the ability to generate internal mental representations that may contain visual details the idea of blind vision becomes a concept subject to investigation In this book Zaira Cattaneo and Tomaso Vecchi examine the effects of blindness and other types of visual deficit on the development and functioning of the human cognitive system Drawing on behavioral and neurophysiological data Cattaneo and Vecchi analyze research on mental imagery spatial cognition and compensatory mechanisms at the sensorial cognitive and cortical levels in individuals with complete or profound visual impairment They find that our brain does not need our eyes to see Cattaneo and Vecchi address critical questions of broad importance the relationship of visual perception to imagery and working memory and the extent to which mental imagery depends on normal vision the functional and neural relationships between vision and the other senses the specific aspects of the visual experience that are crucial to cognitive development or specific cognitive mechanisms and the extraordinary plasticity of the brain as illustrated by the way that in

the blind the visual cortex may be reorganized to support other perceptual or cognitive functions In the absence of vision the other senses work as functional substitutes and are often improved With Blind Vision Cattaneo and Vecchi take on the tyranny of the visual pointing to the importance of the other senses in cognition *Managing Risk in Reinsurance* Niels Viggo Haueter, Geoffrey Jones, 2017 Reinsurance was a global business from the start the method of spreading and balancing risks in international markets But this also meant that reinsurance was more heavily exposed to global trends than many other industries This book gives detailed accounts on how reinsurers dealt with all these challenges **Cover Name: Dr. Rantzau** Nikolaus Ritter, 2019-05-24 Cover Name Dr Rantzau is a gripping diary like personal account of espionage during the Second World War and is one of very few historic memoirs written by an ex Abwehr officer Detailed is how Colonel Nikolaus Ritter following a brief World War I career and over ten years as a businessman in America returned to Germany in spring of 1935 and became Chief of Air Intelligence in the Abwehr He was assigned to establish a network of agents to gather information on British and US airfields aircrafts and state of the art developments in the aerospace industry Among others Ritter's cover names were Dr Rantzau and Dr Reinhard in Holland Belgium and Luxembourg Dr Jansen in Hungary Dr Renken in Germany and Mr Johnson in America Throughout his service in the Abwehr Ritter smuggled America's most jealously guarded secret the Norden bombsight and the Sperry gyroscope into Germany and coordinated the planning for the invasion of the British Isles Operation Sea Lion Ritter was incarcerated by the British in 1945 and sent to the Bad Nenndorf interrogation centre Katharine Ritter Wallace the daughter of Col Ritter presents the first English translation of the German World War II memoir With a combination of collected documents correspondences personal notes communications with peers and from memory this captivating account by an espionage agent reveals an insider's glimpse of the German intelligence service and of a handler's expansive and diverse agent network Preface, by Adolf Friedrich, duke of Mecklenburg, From the Congo to the Shari, by Captain von Wiese und Kaiserswaldau.
