Tips for keeping a **healthy home**

Inspect, clean and repair your home routinely. Take care of minor repairs and problems before they become large repairs and problems.

Ventilate bathrooms and kitchens and use whole house ventilation for supplying fresh air to reduce the concentration of contaminants in the home.

Store poisons out of the reach of children and properly label. Secure loose rugs, and keep children's play areas free from hard or sharp surfaces. Install smoke and carbon monoxide detectors and keep fire extinguishers on hand.

Control the source of dust and contaminants, creating smooth and cleanable surfaces, reducing clutter, and using effective wet-cleaning methods.

Reduce lead-related hazards in pre-1978 homes by fixing deteriorated paint, and keeping floors and window areas clean using wet-cleaning approach. Test your home for radon and install a radon removal system if levels above the EPA action-level are detected.

Prevent water from entering your home through leaks in roofing systems, rainwater from entering the home due to poor drainage, and check your interior plumbing for any leaking.

Houses that do not maintain adequate temperatures may place the safety of residents at increased risk from exposure to extreme cold or heat.

All pests look for food, water and shelter. Seal cracks and openings throughout the home; store food in pest-resistant containers. If needed, use sticky-traps and baits in closed containers, along with least toxic pesticides such as boric acid powder.
