Sport Facility Operations Management Eric C. Schwarz, Timothy Kellison, Jay B. Martyn, Stacey A. Hall, Simon Shibli, 2025-12-23. Now in a fully revised and updated fourth edition, *Sport Facility Operations Management* goes beyond the basic theories of sport facility management to examine the practical realities connecting facilities, people, and technology. An essential textbook for any sport facilities course, it introduces the fundamentals of facility management and presents cutting-edge, evidence-based perspectives that show the reader how to become a more effective practitioner and deliver better results for their organization. Every chapter includes in-depth case studies to illustrate best practice, as well as Technology Now, Facility Focus, and In the Field features to highlight key points. This new edition includes expanded coverage of important themes in contemporary sport facilities operations management, including cybersecurity, the use of AI data analytics, sustainability, and the politics of event bidding and facility financing, as well as a brand new chapter on how to build and develop a career in sport facilities management. This book is an invaluable course text for sport management educators and students, especially those studying facility management. It is also useful reading for industry professionals working in sport facility management, from grassroots and community complexes to global mega stadiums and arenas. Ancillary materials accompanying this book include PowerPoint presentations for each chapter, multiple choice and essay questions, online appendices with diagrams, schematics, manuals, and forms, a glossary, and a sample master syllabus. [Spaces of Security](#) Setha Low, Mark Maguire, 2019-01-22. An ethnographic investigation into the dynamics between space and security in countries around the world. It is difficult to imagine two contexts as different as a soccer stadium and a panic room. Yet they both demonstrate dynamics of the interplay between security and space. This book focuses on the infrastructures of security, considering locations as varied as public entertainment venues, to border walls, to blast-proof bedrooms. Around the world, experts, organizations, and governments are managing societies in the name of security, while scholars and commentators are writing about surveillance, state violence, and new technologies. Yet in spite of the growing emphasis on security, few truly consider the spatial dimensions of security and particularly how the relationship between space and security varies across cultures. This volume explores spaces of security not only by attending to how security is produced by and in spaces but also by emphasizing the ways in which it is constructed in the contemporary landscape. The book explores diverse contexts ranging from biometrics in India to counterterrorism in East Africa to border security in Argentina. The ethnographic studies demonstrate the power of a spatial lens to highlight aspects of security that otherwise remain hidden while also adding clarity to an elusive and dangerous way of managing the world.
