## **Safety Licensable Computing Architecture:**

A Safety Licensable Computing Architecture Wolfgang A Halang, Bernd J Kramer, Soon-key Jung, Johan J Scheepstra, 1993-12-30 This book describes the design of a low complexity fault detecting computer architecture for utilisation in programmable logic controllers PLCs for process control purposes The cyclic operating mode of PLCs and a specification level graphical programming paradigm based on interconnecting application oriented standard software function modules are architecturally supported Thus by design there is no semantic gap between the specification programming and machine execution levels enabling the safety licensing of application software by diverse back translation an extremely simple but rigorous method
