Territorial Integrity in a Globalizing World Abdelhamid El Ouali, 2012-03-28 This book offers a comprehensive highly informative and interdisciplinary study on territorial integrity and the challenges globalization self determination and external interventions present This study aims at not only to fill an epistemological gap in this regard but also answer the question of whether International Law is adequately equipped to help states address these challenges The author argues that the biggest threat that many states are confronted with today is their disintegration rather than their obsolescence and that International Law has not often been able to prevent that eventuality In fact states when they were not destroyed by war managed to survive thanks to the flexibility of territoriality i e their ability to adjust to difficult situations as they arose It is this understanding of adaptation that urges an increasing number of states today to revive territorial autonomy and restore an original understanding of self determination in which democracy is a pivotal factor in establishing congruence between

the states and their nations While this move is endorsed by International Law it is not the case for globalization for their own sake proponents of globalization should recognize that the states are irreplaceable as long as they remain the sole providers of protection for their peoples
