**Rape Law Reform** Cassia Spohn, Julie Horney, 2013-11-27 This book evolved from our interest in rape as feminists and as social scientists As feminists we were concerned about the treatment of rape victims and the attrition in rape cases under traditional rape law and we welcomed legal reforms designed to improve the situation As social scientists we wondered about the efficacy of legal changes aimed at an inherently resistant court system We also were curious about the lack of studies examining the impact of these changes we were particularly surprised to find that no one had attempted to analyze the impact of the reforms in more than one

jurisdiction Convinced that untangling the effects of the reforms from the effects of contextual factors required a multijurisdictional study we decided to undertake the project We quickly discovered that evaluating rape law reform in several jurisdictions would be no easy task We had decided that such an evaluation would require monthly data on the outcome of rape cases before and after the reforms were implemented as well as qualitative data on the attitudes of criminal justice officials toward the reforms Because states do not generate monthly data on case outcomes we would have to collect the data ourselves from court records maintained by individual jurisdictions To obtain an adequate number of cases for the time series analysis we would have to select our sites from large urban jurisdictions scattered throughout the United States

**Social Psychology and Human Sexuality** Roy F. Baumeister, 2001 Presents a selected group of influential articles dealing specifically with the social aspects of sexuality topics covered include differences between male and female sexuality virginity harassment rape and coercion and jealousy

**A Natural History of Rape** Randy Thornhill, Craig T. Palmer, 2001-02-23 A biologist and an anthropologist use evolutionary biology to explain the causes and inform the prevention of rape In this controversial book Randy Thornhill and Craig Palmer use evolutionary biology to explain the causes of rape and to recommend new approaches to its prevention According to Thornhill and Palmer evolved adaptation of some sort gives rise to rape the main evolutionary question is whether rape is an adaptation itself or a by product of other adaptations Regardless of the answer Thornhill and Palmer note rape circumvents a central feature of women's reproductive strategy mate choice This is a primary reason why rape is devastating to its victims especially young women Thornhill and Palmer address and claim to demolish scientifically many myths about rape bred by social science theory over the past twenty five years The popular contention that rapists are not motivated by sexual desire is they argue scientifically inaccurate Although they argue that rape is biological Thornhill and Palmer do not view it as inevitable Their recommendations for rape prevention include teaching young males not to rape punishing rape more severely and studying the effectiveness of chemical castration They also recommend that young women consider the biological causes of rape when making decisions about dress appearance and social activities Rape could cease to exist they argue only in a society knowledgeable about its evolutionary causes The book includes a useful summary of evolutionary theory and a comparison of evolutionary biology's and social science's explanations of human behavior The authors argue for the greater explanatory power and practical usefulness of evolutionary biology The book is sure to stir up discussion both on the specific topic of rape and on the larger issues of how we understand and influence human behavior
