individual's personal experience to enhance their approach to the profession. The authors help students first recognize their personal perspectives of the profession and uncover the assumptions they have concerning learning and teaching. They are then prepared to make mindful informed decisions about their professional education. The topics and activities are deliberately organized to help the reader think as a professional rather than a student. Divided into three parts: a discovery of self, b discovery of teaching and c discovery of learners. The three parts address the primary stages of teacher development. Within each part, readers are connected to the theoretical foundations of the text and the process of becoming an insider to the profession. From Music Student to Teacher: A Professional Approach incorporates online resources and tools that are already familiar to students in their world of networking through social media. Features include Social networking activities to aid self-reflection and discussion. Connecting to the Profession: sections that provide resources which help to bridge the gap between theory and practice. Discussion and glossary that provide a solid base in professional terminology. The Nature of Adolescence John C. Coleman, 2011-03-28. The fourth edition of this successful textbook provides an up-to-date introduction to all of the key features of adolescent development. While drawing on the North American literature on adolescence, it highlights European perspectives and also provides unique coverage of the topic by summarising and reviewing what is known about adolescence from a British viewpoint. Comprehensively updated and rewritten, this edition includes material on new topics such as: The development of the adolescent brain; Sleep patterns in adolescence; Parenting programmes for parents of teenagers; Health including sport and exercise, nutrition and obesity and mental health; Education and schooling; Young people's use of digital technologies; New approaches to resilience and coping. The book places a particular emphasis on a positive view of adolescence and the author develops a new theoretical perspective which looks at how young people themselves construct and shape their own developmental pathways. Interview material taken from discussions with adolescents is included throughout the book and there are sample essay questions and PowerPoint lecture slides available online. This is an essential text for anyone studying human development at undergraduate and postgraduate level as well as on postgraduate courses for professionals including teachers, social workers, health workers, counsellors and youth workers.

Mainstreaming Politics Carol Lee Bacchi, Carol Bacchi, Joan Eveline, 2010. This book offers an innovative rethinking of policy approaches to gender equality and of the process of social change. It brings several new chapters together with a series of previously published articles to reflect on these topics. A particular focus is gender mainstreaming, a relatively recent development in equality policy in many industrialised and some industrialising countries as well as in large international organisations such as the World Bank, the International Monetary Fund and the International Labour Organization. The book draws upon

poststructuralist organisation and policy theory to argue that it is impossible to script reform initiatives such as gender mainstreaming As an alternative it recommends thinking about such policy developments as fields of contestation shaped by on the ground political deliberations and practices including the discursive practices that produce specific ways of understanding the problem of gender inequality In addition to the new chapters the editors Bacchi and Eveline produce brief introductions for each chapter tracing the development of their ideas over four years Through these commentaries the book provides exciting insights into the complex processes of collaboration and theory generation Mainstreaming Politics is a rich resource for both practitioners in the field and for theorists In particular it will appeal to those interested in public policy public administration organisation studies sociology comparative politics and international studies **The Long Journey**
