Undergraduates and general public interested in economic issues affecting Singapore and Asian Economies **The Political Economy of Wasta: Use and Abuse of Social Capital Networking** Mohamed A. Ramady, 2015-11-23 The term wasta stems from the Arabic root for middle or medium and describes the phenomenon of using connections to find job government services or other favors to circumvent bureaucracy or bypass the system as a whole The effects of wasta may be both positive or negative and is not a phenomenon that is particular to the Arab or Muslim world but also to many other cultures and regions of the world with similar concepts popularly known as ubuntu guanxi harambee naoberschop or old boy network used in African Chinese and European societies By its very nature wasta is an area of grey or even black information and like corruption to which it is most often associated is hard to assess although country corruption perception indexes attempt to provide a quantifiable basis In the final analysis such ratings are based on perceptions of corruption and this perception may vary strongly depending on different societal structures and cultural modes whether these are extended

family systems tribal clans or more atomized societies where relationships are essentially transactional and rule based In a western perspective where wasta may be considered as a form of corruption in other societies it may be perceived as something natural and not criminal and using one s wasta in tribal societies to help clan members is seen as a duty The difference stems from the innocent use of wasta to make introductions as opposed to its abuse in placing unqualified persons in positions The volume brings together academics and professional experts to examine a range of multi faceted social economic and political issues raised by the use and abuse of social networking covering various topics like wasta interpersonal connections in family and business ties The relationship between inequality adjusted human development and corruption perception indexes in the Gulf region wasta and business networking assessing the economic cost of wasta wasta and its impact on quality oriented education reform and the perceptions of young people The use of wasta to overcome socio cultural barriers for women and men The volume also offers insights into social relations and ethics and how the use of wasta contradicts with common held religious principles along with some country studies on Islamic principles and the use of wasta Mohamed Ramady is a Visiting Associate Professor King Fahd University of Petroleum and Minerals Saudi Arabia

Shelar, Gadamsetty Surya,2025-03-20 The Mega Yearbook 2020 for Competitive Exams - 5th Edition Disha Experts,2019-12-04 **Housing the Nation - a Singapore Policy Story** Kim Hin / David Ho,2020-12-17 Chapter 1 takes a close look at a unique and state of the art dynamic structural public housing macroeconomic model DSPHM based on an open economy for several key macroeconomic variables actual and expected as well as the demand for new HDB flats sold This Chapter readily adopts the DSPHM for simulating two scenarios namely a no change first scenario and a public housing deregulation second scenario Chapter 2 explores the relationship between several economic factors and the demand for public housing in Singapore and Hong Kong deploying the innovative and versatile system dynamics model to shed better understanding on the policy implications of assisted ownership housing The Chapter assesses the demand for new flats of the Singapore and Hong Kong economies under certain macroeconomic policy changes suitable for their unique situations

Chapter 3 is concerned with the underlying structural relationships that affect Singapore's public housing policy to potentially privatize the HDB concessionary rate mortgages for HDB homebuyers. Such a potential privatization infuses and sustains price competitiveness among the domestic private banks in Singapore and leads to improved efficiency among them as well as the Singapore economy at large. Chapter 4 is concerned with the binomial option pricing model proposed by Cox, Ross, and Rubinstein (1979) which is appropriate to represent the movement of the underlying HDB resale flat prices subject to private market forces in HDB's large scale public housing secondary resale market. The HDB Main Upgrading Program (MUP) is a heavily subsidized and highly targeted public housing policy. Since its inception in 1992, the HDB has budgeted some S\$3 billion to finance the MUP policy. Chapter 5 recognizes housing affordability to be always an issue of concern to many Singaporean homebuyers because shelter forms one of the basic life necessities. The corresponding private residential market in Singapore offers quality and premium private residential accommodation for homebuyers who prefer the private residential market. The appropriate affordability model is a multi-factor housing affordability index (HAI) model which considers the ability to provide down payment and to service the mortgage taken up. Lastly, Chapter 6 offers the book's conclusion.

Charting a New Course Mike Mansfield, 1976 *Limits of Economic and Social Knowledge* S.

DeCanio, 2013-11-21 The book aims to show that the deterministic vision embodied in conventional economic modelling is neither consistent with nor supported by the state of the art in mathematics, logic, and physical science. DeCanio recognizes that economic agents are intrinsically free and somewhat unpredictable, which is essential for economic and social theory.
