The Ancient Maya, 6th Edition Robert J. Sharer, Loa P. Traxler, 2006 The rich findings of recent exploration and research are incorporated in this completely revised and greatly expanded sixth edition of this standard work on the Maya people New field discoveries new technical advances new successes in the decipherment of Maya writing and new theoretical perspectives on the Maya past have made this new edition necessary Man's Conquest of the Pacific Peter S. Bellwood, 1979 Brief comments on Australian prehistory **International Directory of Anthropologists**, 1975

American Book Publishing Record, 1999 **Paperbacks in Print**, 1979 **Environmental Change in the Pacific Basin** Patrick D. Nunn, 1999-06-09 Talk of the human enhanced greenhouse effect and the ways in which it may affect our lives has made many people more aware of environmental change We have come to realize that the environment is and has always been in a state of continuous change and that we and other organisms have had to adjust our lifestyles accordingly This book focuses on the Pacific Basin a vast region which can be considered a microcosm of the entire surface of the Earth and which has suffered from being marginalized in most accounts of Earth surface processes and phenomena In this book the Pacific Basin includes the Pacific Ocean and Islands and also the Pacific Rim which is divided into the subregions of Antarctica South America Central America North America Beringia East Asia and Australasia Professor Nunn begins by outlining the distant origins of the modern Pacific Basin more than 1000 million years ago then traces its development through the Palaeozoic and Mesozoic into the Cenozoic Era For this time the last 66 million years the history of environmental change becomes progressively better known For the last 18 million years the Quaternary period the Earth's climate has oscillated between warm and cool producing synchronous environmental changes throughout most of the Pacific Basin The importance of volcanism and tectonics land level movements for which the Pacific Basin is well known as causes of environmental change is explained in detail The effects of human activities on most Pacific Basin environments began to be registered only during the Holocene the last 12 000 years culminating in the environmental crisis which currently afflicts many parts of this region While the role of humans in altering Pacific Basin environments is discussed in detail considerable attention is also given to the ways in which environmental change caused changes to human lifestyles which had far reaching consequences **Geography and Anthropology** Harvard University. Library, 1979 **Widener Library Shelflist:**

Geography and anthropology Harvard University. Library, 1979 **People of India** M. K. Bhasin, Hubert Walter, Heidi Danker-Hopfe, 1994 Older works in Indian anthropology essentially were restricted to compilation and descriptive studies of biological and sociological parameters The authors give an overview of existing studies of this type and add results of their own extensive studies They however move on to the application of modern methods of anthropology with the aim towards the analysis of causes and the understanding of the population biology The closing sentence the summary states correctly It may be concluded that to understand the population variation of the heterogeneous Indian society there is a need for a holistic

approach involving environment sociocultural integrations and biological traits The authors made a big step toward this goal This book is not only a rich source of information and of stimulating reading it represents an outstanding example of very fruitful cooperation of an Indian and German team toward a common goal **Whitaker's Cumulative Book List** ,1968
