## **Shadow Flights:**

*Shadow Flights* Curtis Peebles, 2000 Historian Peebles draws on previously top secret documents from both countries and the recollections of participants on both sides to recount the US spy plane program against the Soviet Union after World War II The lid was blown off and the program ended with the downing of Francis Gary Powers in his U 2 spyplane Annotation copyrighted by Book News Inc Portland OR     Shadows Gaynor Deal, 2011-03-14 Imperial Princess Jenevra Couressime is an unwelcome reminder to her family of an incident they would all rather forget the murder of her parents Often ignored fourteen year old Jenevra is not surprised when she is sent from court to a rigidly disciplined life in exile Hopeful that she will never have to see any of her family again Jenevra soon finds a cold satisfaction in the harsh discipline of a Temple Order Jenevra becomes an assassin of chilling efficiency perfectly equipped to serve as protector to her cousin who happens to be the new Emperor But after her return to court thrusts her unwillingly back into palace life and intense military challenges Jenevra must face emotional upheaval and confrontation as she attempts to reconcile with her family As Jenevra contends with senior officers in the imperial army she learns the truth about why she was chosen to bear a talisman that seems intent on pulling her into the darkest shadows of her mind Unexpected twists and turns soon surround a young princess constantly challenged to prove herself and who will soon discover that her carefully constructed defenses are not quite as impenetrable as she once thought     Shadows Of Flight Richard Jenkins, 2018-06-19 After eight years as a pilot in the Royal Navy flying jet aircraft from the decks of aircraft carriers the writer moved to a new challenge that of starting a farm in the wilds of the African bush in Northern Rhodesia After nearly twenty years as a successful farmer growing tobacco and maize and ranching some four hundred cattle on an adjoining farm the e Winds of Changee forced him to return to the flying world Starting as a e Charter pilote in Zambia he ended his career flying and teaching pilots in the BAC 1 11 aircraft in Cyprus     *Shadow over the Atlantic* Robert Forsyth, 2017-07-27 German U boats were the scourge of Allied merchant and military shipping in the Atlantic during World War II threatening to isolate and then starve the UK out of the War As Germany s war against the Allied convoys intensified in late 1943 German Admiral Karl D nitz called upon the Luftwaffe to provide a long range spotting and shadowing unit to act as eyes for his U boats Equipped with big four engined Junkers Ju 290s fitted out with advanced search radar and other maritime ELINT electronic intelligence devices Fernaufkl rungsgruppe FAGr 5 Atlantik undertook a distant isolated campaign far out into the Atlantic and thousands of miles away from its home base in western France The information generated and reported back to D nitz s headquarters was vital to the efforts of the U boats and FAGr 5 s shadowing missions were assigned priority in terms of skilled crews supplies and equipment This book tells for the first time the fascinating story of the formation and operations of FAGr 5 Atlantik drawing on never before published historical records of the unit that accounted for the reporting and destruction of thousands of tons of Allied shipping     **Fighting in the Electromagnetic Spectrum** Thomas Wildenberg, 2023-08-15 Naval warfare was confined for centuries to surface combat or

undersea clashes In the twentieth century aerial warfare became the third domain and shortly thereafter the electromagnetic spectrum also appeared Until now little has been written about this important aspect of military conflict on the high seas In *Fighting in the Electromagnetic Spectrum* author Thomas Wildenberg provides the first book covering these aircraft their missions and the methodology of conducting combat in all its forms along this fourth domain the electromagnetic spectrum When navies began to make use of the airwaves they soon discovered those waves could also be exploited as a source of information about the opposing force This would later be termed Electronic Intelligence ELINT Navies learned the value of interrupting or corrupting the enemy's communication signals that were transmitted in the ether thus began a method of fighting termed Electronic Warfare EW Wildenberg cuts through the secrecy about this understandably mysterious domain of combat He offers details on aircraft and methods and provides a layman's set of definitions of terms Wildenberg shares lessons learned from World War II skirmishes as well as clashes in the Korean and Vietnam wars while providing a *Fighting in the Electromagnetic Spectrum* offers the reader a foundational understanding of this complex form of combat in all its forms This volume discloses rarely covered concepts and methods which will shape future great power future conflict

**Eyeing the Red Storm** Robert M. Dienesch, 2016-04. In 1954 the U S Air Force launched an ambitious program known as WS 117L to develop the world's first reconnaissance satellite. The goal was to take photographic images from space and relay them back to Earth via radio. Because of technical issues and bureaucratic resistance, however, WS 117L was seriously behind schedule by the time Sputnik orbited Earth in 1957 and was eventually cancelled. The air force began concentrating instead on new programs that eventually launched the first successful U S spy satellites. Eyeing the Red Storm examines the birth of space-based reconnaissance not from the perspective of CORONA, the first photo reconnaissance satellite to fly, but rather from that of the WS 117L. Robert M Dienesch's revised assessment places WS 117L within the larger context of Dwight D Eisenhower's presidency, focusing on the dynamic between military and civilian leadership. Dienesch demonstrates how WS 117L promised Eisenhower not merely military intelligence but also the capacity to manage national security against the Soviet threat. As a fiscal conservative, Eisenhower believed a strong economy was the key to surviving the Cold War and saw satellite reconnaissance as a means to understand the Soviet military challenge more clearly and thus keep American defense spending under control. Although WS 117L never flew, it provided the foundation for all subsequent satellites, breaking theoretical barriers and helping to overcome major technical hurdles which ensured the success of America's first working reconnaissance satellites and their photographic missions during the Cold War. *A Technique for Determining Relaxation Times by Free-flight Tests of Low-fineness-ratio Cones; with Experimental Results for Air at Equilibrium Temperatures Up to 3440 K* Jack D. Stephenson, 1960 This report describes a technique which combines theory and experiments for determining relaxation times in gases The technique is based on the measurement of shapes of the bow shock waves of low fineness ratio cones fired from high velocity guns The theory presented in the report provides a means by which shadowgraph data showing the bow waves can be analyzed so as to

furnish effective relaxation times Relaxation times in air were obtained by this technique and the results have been compared with values estimated from shock tube measurements in pure oxygen and nitrogen The tests were made at velocities ranging from 4600 to 12 000 feet per second corresponding to equilibrium temperatures from 35900 R 19900 K to 6200 R 34400 K under which conditions at all but the highest temperatures the effective relaxation times were determined primarily by the relaxation time for oxygen and nitrogen vibrations
