The Chemical Weapons Taboo Richard M. Price, 2018-09-05 Richard M Price asks why among all the ominous technologies of weaponry throughout the history of warfare chemical weapons carry a special moral stigma Something more seems to be at work than the predictable resistance people have expressed to any new weaponry from the crossbow to nuclear bombs Perceptions of chemical warfare as particularly abhorrent have been successfully institutionalized in international proscriptions and Price suggests understanding the sources of this success might shed light on other efforts at arms control To explore the origins and meaning of the chemical weapons taboo Price presents a series of case studies from World War I through the Gulf War of 1990 1991 He traces the moral arguments against gas warfare from the Hague Conferences at the turn of the century through negotiations for the Chemical Weapons Convention of 1993 From the Italian invasion of Ethiopia to the war between Iran and Iraq chemical weapons have been condemned as the poor man's bomb Drawing upon insights from Michel Foucault to explain the role of moral norms in an international arena rarely sensitive to such pressures he focuses on the construction of and mutations in the refusal to condone chemical weapons

Allies at Odds? T. Mowle, 2004-10-28 Why despite their similar goals do the policy preferences of the European Union and United States diverge on so many multilateral issues To answer that question *Allies at Odds* thoroughly examines recent international efforts in arms control environmental protection human rights and military cooperation Evidence from 20 separate cases supports the expectations of the realist approach to international politics which focuses on the role of power above all Neither cultural factors nor international institutions have as much influence as some expect This finding was as true during the Clinton Presidency as during the Bush indicating that focusing on personalities overlooks more substantial and longer lasting differences between the Atlantic allies *Netherlands Yearbook of International Law* 1997 T. M. C. Asser Instituut, 1998-07-15 Contains an extensive review of Dutch state practice from the parliamentary year 1998 1999

Martin Rochester, 2016-02-19 This book looks at the evolving relationship between war and international law examining the complex practical and legal dilemmas posed by the changing nature of war in the contemporary world whether the traditional rules governing the onset and conduct of hostilities apply anymore and how they might be adapted to new realities War always messy has become even messier today with the blurring of interstate intrastate and extrastate violence How can the United States and other countries be expected to fight honourably and observe the existing norms when they often are up against an adversary who recognizes no such obligations Indeed how do we even know whether an armed conflict is underway when modern wars tend to lack neat beginnings and endings and seem geographically indeterminate as well What is the legality of anticipatory self defense humanitarian intervention targeted killings drones detention of captured prisoners without POW status and other controversial practices These questions are explored through a review of the United Nations Charter Geneva Conventions and other regimes and how they have operated in recent conflicts Through a series of case studies including the U S war on

terror and the wars in Afghanistan Iraq Gaza Kosovo and Congo the author illustrates the challenges we face today in the ongoing effort to reduce war and when it occurs to make it more humane **Parameters** ,1994 **Weapons**
