Shadows of Hiroshima Wilfred Burchett, 2025-08-05 An Australian journalist the first westerner to enter Hiroshima after the nuclear bomb was dropped recounts his impressions of the decimated city and the treatment of the survivors I Write This As A Warning To The World This headline in the London Daily Express on 5 September 1945 was the first cry of alarm that the age of threatening nuclear catastrophe had dawned Wilfred Burchett who became the most famous radical journalist of his generation wrote It and the accompanying story in the ruins of Hiroshima He was the first Westerner of any kind to enter the city after the atomic blast The story of his efforts to reach Hiroshima is retold in this dramatic book It shows how the politics of nuclear confusion was inaugurated before the ashes of the city had cooled Burchett details the attempts by the US government to deny the effects of radiation sickness described in his reports He reveals the pressure to silence him through deportation from Japan and in a telling analysis he uncovers once more the political calculations that led Truman to drop the bomb The other major character in this book Is the population of Hiroshima itself The survivors of the attack and their children have lived with the legacy of nuclear war for two generations The author a regular visitor to the city recounts their experience of callous treatment medical neglect social isolation and eventual reinvigoration through the Japanese peace movement

Shadows of Nagasaki Chad R. Diehl, 2024-01-02 A critical introduction to how the Nagasaki atomic bombing has been remembered especially in contrast to that of Hiroshima In the decades following the atomic bombing of Nagasaki on August 9 1945 the city's residents processed their trauma and formed narratives of the destruction and reconstruction in ways that reflected their regional history and social makeup In doing so they created a multi layered urban identity as an atomic bombed city that differed markedly from Hiroshima's image Shadows of Nagasaki traces how Nagasaki's trauma history and memory of the bombing manifested through some of the city's many post atomic memoryscapes such as literature religious discourse art historical landmarks commemorative spaces and architecture In addition the book pays particular attention to how the city's history of international culture exemplified best perhaps by the region's Christian especially Catholic past informed its response to the atomic trauma and shaped its postwar urban identity Key historical actors in the volume's chapters include writers Japanese Catholic leaders atomic bombing survivors known as hibakusha municipal officials American occupation personnel peace activists artists and architects The story of how these diverse groups of people processed and participated in the discourse surrounding the legacies of Nagasaki's bombing shows how regional history

culture and politics rather than national ones become the most influential factors shaping narratives of destruction and reconstruction after mass trauma In turn and especially in the case of urban destruction new identities emerge and old ones are rekindled not to serve national politics or social interests but to bolster narratives that reflect local circumstances

The Instant and Its Shadow Jean-Christophe Bailly,2020-04-07 A compelling and innovative reflection on the way photography captures and condenses time Two photographs connected by a ladder separated by a century First William Henry Fox Talbot photographed a faithfully realistic image of a ladder against a haystack in the English countryside One hundred years later an anonymous photographer captured another ladder photographed alongside an incinerated man by the blinding light of the atomic bomb These two images underpin a poetic and theoretical reflection on the origins of photographic technique the imaginative power of montage and the relation of photography to time itself in Jean Christophe Bailly s *The Instant and Its Shadow* translated into English for the very first time A rare find of intellectual caliber and theoretical rigor *The Instant and Its Shadow* pursues a unique and powerful reflection on the first hundred years of photography s history and on the essence of the photographic art in general Inspired by the unexpected coming together of these two iconic images the book begins by retracing Talbot s invention of the photographic calotype in the early nineteenth century highlighting the paradox that saw Talbot wishing to imitate the representative arts of painting and drawing while simultaneously liberating the image from any

imitative paradigm This analysis leads Bailly to elucidate photography's relation to material and visual reality A meditation on photography's seeming ability to stop time follows concluding with the photographs of Hiroshima and the photographic nature of the atomic bomb Building on an inspired juxtaposition of The Haystack with the Hiroshima photographs the book becomes a testament to the potency of photomontage arguing that the more singular an image the greater its connective power Bailly's book is at once a lyrical homage to some of the founding texts of photographic theory and a startling reminder of the uncanny power of photography itself Part theoretical reflection part lyrical reverie The Instant and Its Shadow is packed with profound and stellar insights about the medium
