The essays by directors, historians, actor trainers and actors bridge the gap between theories and practices of acting and between East and West. No other book provides such a wealth of primary and secondary sources, bibliographic material and diversity of approaches. It includes discussions of such key topics as how we think and talk about acting, acting and emotion, the actor's psychophysical process, the body and training the actor in performance, non-Western and cross-cultural paradigms of the body, training and acting. *Acting Reconsidered* is vital reading for all those interested in performance.

Making Interdisciplinary Performance Gianna Bouchard, Adam J. Ledger, 2025-05-15. This collection offers an examination of and guide to interdisciplinary collaboration through the working practices of performance makers, exploring its pleasures, problems and pitfalls. The book explores contemporary working practices at the interfaces between performance and other disciplines. Focusing on collaborations between theatre makers and these others, it investigates the processes and conditions involved in the interdisciplinary. Chapters cover areas such as psychology, the environment, physical cultures, the military, healthcare, festivals and communities, architecture, pedagogy and fine dining. At a time when interdisciplinary practice is actively encouraged in the academy, this book asks what it means in practical terms to engage with artists and scholars outside of our home territories. Where does the interdisciplinary exist and what does it rely on? How do theatre makers approach and sustain these projects? What is the nature of the journey? Offering examples of unusual collaborations and arranged through 3 key areas of performance, making this book acknowledges the difficulties of such work and that the aims of interdisciplinarity can fail while examining how new methods and understandings can shift notions of knowledge.

Creativity: the Actor in Performance Helen Treno, 2014-01-01. *Creativity the Actor in Performance* focuses on what it takes to be a creative performer. Many stage actors succeed in rehearsals yet underperform where it counts in performance. But as actors know, performance is a thing unto itself; something is going to have to happen out there beyond anything that happened in rehearsals. This book provides actors, their teachers and directors with insights into the creativity of the actor in performance. An historical account of the emergence and development of one of the most generative concepts of our times, creativity provides a theoretical backdrop to a critical discussion of the creativity of acting, a discussion that includes analyses of Denis Diderot, George Henry Lewes, William Archer, Konstantin Stanislavsky, Michael Chekhov, Michel Saint Denis, Zeami and Eugenio Barba. *Creativity the actor in performance* concludes by offering a detailed rationale for performance-oriented actor training, offering examples of workshop exercises, CREATICS, which focus on developing four main competencies crucial for successful and creative performances: situation awareness, audience awareness, divided consciousness and presence.
