American Agriculture and the Problem of Monopoly Jon Lauck,2016-02-01 The breathtaking number of mergers and joint ventures among agribusiness firms has left independent American farmers facing the power of an increasingly concentrated buying sector The origin of farmers concern with such economic concentration dates back to protests against meatpackers and railroads in the late nineteenth century Jon Lauck examines the dimensions of this problem in the American Midwest in the decades following World War II He analyzes the nature of competition within meat packing and grain markets In addition he addresses concerns about corporate entry into production agriculture and the potential displacement of a production system defined by independent family farms Lauck also considers the ability of farmers to organize in order to counter the market power of large scale agribusiness buyers He explores the use of farmer cooperatives and other mechanisms which may increase the bargaining power of farmers The book offers the first serious historical examination of the National Farmers Organization which fully embraced the bargaining power cause in the postwar period Lauck finds that independent farmers attempts at organization have been more successful than previously recognized but he also shows that their successes have been undermined by the growing concentration and power of agri business firms

justifying a new approach to antitrust law in agricultural markets A New History of Iowa Jeff Bremer, 2023-10-06 The state of Iowa is largely unappreciated and often misunderstood. It has a small population and sits in the middle of a huge country. It's thought of as an uninspiring place full of farms and fields of corn. But Iowa represents America as surely as New York and California, and Iowa's history is more dynamic, complicated, and influential than commonly imagined. Jeff Bremer's *A New History of Iowa* offers the most comprehensive history of the Hawkeye State ever written, surveying Iowa from the last ice age through the COVID-19 pandemic. It tells a new and vibrant story, examining the state's small-town culture, politics, social and economic development, and its many diverse inhabitants. Bremer features well-known individuals such as Sauk leader Black Hawk, artist Grant Wood, botanist George Washington Carver, suffragist Carrie Chapman Catt, and President Herbert Hoover. But Bremer broadens the state's story by including new voices among them: runaway enslaved men who joined Iowa's 60th Colored Regiment in the Civil War, young female pearl button factory workers, Latino railroad workers who migrated to the state in the early twentieth century, and recent refugees from Southeast Asia and the Balkans. This new story of Iowa provides a brisk, readable narrative written for a broad audience, from high school and college students to teachers and scholars to general readers. It tells the story of ordinary and extraordinary people of all backgrounds and greatly improves our knowledge of a state whose history has been neglected. *A New History of Iowa* is for everyone who wants to learn about Iowa's surprising, complex, and remarkable past.

Courts and Congress Robert A. Katzmann, 2010-12-01 What role should the Senate play in the selection and confirmation of judges? What criteria are appropriate in evaluating nominees? What kinds of questions and answers are appropriate in confirmation hearings? How do judges interpret laws enacted by Congress, and what problems do they face? And what kinds of communications are proper between judges and legislators? These questions go to the heart of the relationship between the federal judiciary and Congress, a relationship that critically shapes the administration of justice. The judiciary needs an environment respectful of its mission, and the legislative branch seeks a judicial system that faithfully construes its laws and efficiently discharges justice. But the judicial-congressional relationship is hindered by an array of issues, including an ever-rising judicial caseload, federalization of the law, resource constraints, concerns about the confirmation process, increasing legislative scrutiny of judicial decisionmaking, and the administration of justice. Drawing on the world of scholarship and from personal experience, Robert A. Katzmann examines governance in judicial-congressional relations. After identifying problems, he offers ways to improve understanding between the two branches. Copublished with the Governance Institute.

Making Policy, Making Law Mark C. Miller, Jeb Barnes, 2004-08-23 The functioning of the U.S. government is a bit messier than Americans would like to think. The general understanding of policymaking has Congress making the laws, executive agencies implementing them, and the courts applying the laws as written, as long as those laws are constitutional. *Making Policy, Making Law* fundamentally challenges this conventional wisdom, arguing that no dominant institution or even a

roughly consistent pattern of relationships exists among the various players in the federal policymaking process. Instead, at different times and under various conditions, all branches play roles not only in making public policy but in enforcing and legitimizing it as well. This is the first text that looks in depth at this complex interplay of all three branches. The common thread among these diverse patterns is an ongoing dialogue among roughly coequal actors in various branches and levels of government. Those interactions are driven by processes of conflict and persuasion distinctive to specific policy arenas as well as by the ideas, institutional realities, and interests of specific policy communities. Although complex, this fresh examination does not render the policymaking process incomprehensible; rather, it encourages scholars to look beyond the narrow study of individual institutions and reach across disciplinary boundaries to discover recurring patterns of interbranch dialogue that define and refine contemporary American policy. **Making Policy Making Law** provides a combination of contemporary policy analysis, an interbranch perspective, and diverse methodological approaches that speak to a surprisingly overlooked gap in the literature dealing with the role of the courts in the American policymaking process. It will undoubtedly have significant impact on scholarship about national lawmaking, national politics, and constitutional law. For scholars and students in government and law, as well as for concerned citizenry, this book unravels the complicated interplay of governmental agencies and provides a heretofore in-depth look at how the U.S. government functions in reality.

To Establish Justice for All Earl Johnson, 2013-11-12 For over a century, many have struggled to turn the Constitution's prime goal to establish Justice into reality for Americans who cannot afford lawyers through civil legal aid. This book explains how and why. American statesman Sargent Shriver called the Legal Services Program the most important of all the War on Poverty programs he started. American Bar Association president Edward Kuhn said its creation was the most important development in the history of the legal profession. Earl Johnson Jr., a former director of the War on Poverty's Legal Services Program, provides a vivid account of the entire history of civil legal aid from its inception in 1876 to the current day. The first to capture the full story of the dramatic ongoing struggle to bring equal justice to those unable to afford a lawyer, this monumental three-volume work covers the personalities and events leading to a national legal aid movement and decades later, the federal government's entry into the field and its creation of a unique institution: an independent Legal Services Corporation to run the program. The narrative also covers the landmark court victories the attorneys won and the political controversies those cases generated along with the heated congressional battles over the shape and survival of the Legal Services Corporation. In the final chapters, the author assesses the current state of civil legal aid and its future prospects in the United States.

Trading at the Speed of Light Donald MacKenzie, 2023-01-31 **Trading at the Speed of Light** tells the story of how many of our most important financial markets have transformed from physical trading floors on which human beings trade face to face into electronic systems within which computer algorithms trade with each other. Tracing the emergence of ultrafast automated high-frequency trading (HFT) since the early 2000s, Donald MacKenzie draws particular attention to the importance of what he

deems the material political economy of twenty first century finance Fast transmission of price data used to involve fibre optic cables but the strands in such cables are made of materials usually a specialised form of glass which slow light down to around two thirds of its speed in free space By contrast microwave and other wireless signals used in HFT travel through the atmosphere at nearly full light speed At these nanosecond speeds the physical nature of information transmission and the precise spatial location of the equipment involved become hugely important thus creating inevitable pinch points in the system MacKenzie details the ways in which these pinch points individual frequency bands specific locations on the roofs of computer data centres and particular sites for microwave towers are especially advantageous making it possible for those who control them to profit from that control The book draws from over 300 interviews conducted with high frequency traders around the world the people who supply them with technological systems and communication links exchange staff and regulators as well as with others who function within markets that have not yet become dominated by HFT MacKenzie focuses most closely upon the four main sites of international HFT Chicago New York Amsterdam and London and examines both the technology and the politics underpinning modern financial markets Provided by publisher To Designate the Federal Building Located at 210 Walnut Street in Des Moines, Iowa, as the "Neal Smith Federal Building United States. Congress. House. Committee on Transportation and Infrastructure,2007 *Wright Patman* Nancy Beck Young,2000 Nancy Beck Young s is the first book length assessment of Texas Congressman Wright Patman s public life Based on exhaustive research this crisp congressional biography analyzes one of the twentieth century s most colorful and controversial legislators Elected to the House of Representatives in 1928 and serving until his death in 1976 Patman combined populism with liberalism to fashion his own vision of how best to preserve the American Dream Patman often operated on the margins of Washington politics but through the force of his personality and his effectiveness as a speaker he was able to coerce his colleagues to address his reform agenda His abilities as a campaigner and his dependability as a Democratic vote in Congress on all questions except civil rights made him an important though sometimes unwelcome ally for the Democratic presidents under whom he served From his earliest days in Congress Patman sought payment of a bonus for World War I veterans to fulfill a debt to the men who fought for their country as well as to provide a depression relief and reform program that would expand the nation s currency His assault on chain stores stemmed from his concern that they were destructive of mom and pop ventures as well as traditional American values and communities During and after World War II he lobbied for programs beneficial to the small businesses he believed were victims of a federal policy that encouraged large multinational corporations In the 1960s and 1970s he added a new dimension to his attack on elite privileges maintaining that most large foundations existed not for charitable purposes but as tax dodges for the wealthy families that established them His perennial crusade against the Federal Reserve and against high interest rates intensified as interest rates and inflation grew Perhaps the most obvious evidence of his partisanship came with his aborted attempt to investigate Richard Nixon s activities in the

Watergate affair prior to the 1972 election The last major fight of his career was his futile effort to retain his chairmanship of the Banking and Currency Committee in 1975 His defeat was a testimonial to the changes liberalism underwent during his career in Washington D C A new generation of reformers no longer cared about the economic populism that drove much of his agenda for forty seven years This book is essential reading for anyone interested in twentieth century politics and policy development

Exploring Judicial Politics Mark Carlton Miller, 2009 Exploring Judicial Politics presents twenty original essays by political scientists and judicial scholars on a variety of topics relative to judicial politics These readings explore the ways in which law and politics intertwine in the United States and cover issues from the trial court level all the way to the Supreme Court taking into account the various actors in the American legal system In addition they provide insights into how judicial scholars go about studying and interpreting various phenomena in the field Exploring Judicial Politics is an ideal resource for undergraduate courses in Judicial Politics U S Courts and Law and Society

Why Moderates Make the Best Presidents Gil Troy, 2012-09-12 George Washington Abraham Lincoln Theodore Roosevelt Franklin Delano Roosevelt John F Kennedy Ronald Reagan most would agree their presidencies were amongst the most successful in American history But what made these very different men such effective leaders According to presidential historian Gil Troy these presidents succeeded not because of their bold political visions but because of their moderation Although many presidential candidates claim to be moderates the word cannot conceal a political climate defined by extreme rhetoric and virulent partisanship In this book Troy argues that this is a distinctly un American state of affairs The great presidents of American history have always sought a golden mean from George Washington who brilliantly mediated between the competing visions of Thomas Jefferson and Alexander Hamilton to Abraham Lincoln who rescued the union with his principled pragmatism to the two Roosevelts Theodore and Franklin who united millions of Americans with their powerful affirmative nationalist visions Moderation in politics is difficult to achieve in an age of excess an anything goes culture feeds an all or nothing politics In the face of challenges both at home and abroad Troy calls for a muscular moderation a powerful affirmation of the values that united us and a commitment to a politics that builds from the center rather than playing to extremes As America lines up to select its next president Gil Troy brilliantly reminds us of the finest traditions of presidential leadership from our nation s past Published in 2008 by Basic Books as *Leading from the Center* This is first time in paperback
