Mr Goethes Garden:

Mr. Goethe's Garden Diana Cohn, 2003-05 Mr Goethe's Garden tells the story of a unique friendship between an inquisitive young girl Irena and her neighbor the elderly world famous playwright artist and natural scientist Johann von Goethe Irena visits Mr Goethe in his well tended garden where he teaches her to draw and to observe the world of nature in a special way Set in the 1830s this book was inspired by Goethe's life and his botanical treatise *The Metamorphosis of the Plant* Exquisitely sensitive illustrations and elegant text reveal the intricate wonders of the plant kingdom As the bonds of friendship deepen between Irena and her wise neighbor she experiences a new way of seeing the natural cycle of the plant from seed to flower to fruit and to seed again Like friends plants tell you their secrets only when they know you care Just practice listening with your eyes and one day when you least expect it you will see with your heart and be swept up into nature's dance An informative afterword describes the life of Goethe and his many accomplishments Ages 6-9 Click on the links below to view images from Mr Goethe's Garden

Goethe's Theory of Colours Johann Wolfgang von Goethe, 1840 This work by Johann Wolfgang von Goethe 1749-1832 was translated into English in 1840 by Sir Charles Eastlake 1793-1865 painter and later keeper of the National Gallery Goethe's 1810 work was rejected by many contemporary scientists because it appeared to contradict the physical laws laid down by Newton However its focus on the human perception of the colour spectrum as opposed to the observable optical phenomenon was attractive to and influential upon artists and philosophers As Eastlake says in his preface the work's dismissal on scientific grounds had caused a well arranged mass of observations and experiments many of which are important and interesting to be overlooked Eastlake also puts Goethe's work into its aesthetic and scientific context and describes its original reception His clear translation of Goethe's observations and experiments on colour and light will appeal to anyone interested in our responses to art
