Evidence-Based Learning and Teaching Melissa Barnes, Maria Gindidis, Sivan Phillipson, 2018-05-08 Education has become a political economic and social priority for Australia with the success of schools and teachers being an integral part of the economic and social future of the country. As a result, quality assurance for learning and teaching has become increasingly debated among policy makers and the broader public with a call for more evidence data and standards to ensure that schools and teachers are held accountable for students learning outcomes. In response, this book provides a snapshot of the types of evidence and data relating to learning outcomes that are being collected in our classrooms within Australia. The chapters in this book seek to interrogate current views of learning and teaching beyond what is measured in external assessments that only capture a limited view of student learning outcomes. The chapters explore a range of fundamental topics within education including positive learning environments, student voice and assessment. They explore and articulate the vital knowledge and skills needed for current and future teachers. In addition, these chapters make clear links between teaching, learning and the theories that frame, shape and inform these learning and teaching processes. The research presented in this book provides practical and theoretical insights into learning and teaching in early years, primary, secondary and tertiary education.

The texts described in the book are divided into 24 general topics including Science, Nonfiction, Struggle and Survival, Fantasy, Literature, Sports, Games and Hobbies, and Mathematics in Our World. To highlight literature that reflects the schools' multiple ethnicities, the booklist also introduces readers to recent literature that celebrates African American, Asian and Pacific Island, Hispanic American and indigenous cultures. Each chapter begins with a brief list of selection criteria, a streamlined list of all annotated titles in that chapter, and an introduction in which chapter editors discuss their criteria and the status of available books in that subject area. While the reviews were written by adults, the voices and opinions of children are often included as well, lending credence to adult choices of the quality children's books.
