Mt St Helens Surviving The Stone Wind:

Mt. St. Helens Catherine Jean Hickson, 2005 Experience the exhilaration and terror of the Mt St Helens eruption through this amazing eyewitness account Renowned volcanologist Dr Catherine Hickson vividly portrays one of the most spectacular geological events of the 20th century As a young geology student at the time of the eruption on May 18 1980 she watched from only 9 miles away as the dramatic explosion created a stone wind of molten rock and ash Traveling at more than 300 miles an hour in 3 short minutes it redefined the lives of many people and flattened 230 square miles of forest in Washington State The devastation stopped 2 miles short of the author s location and claimed 57 lives Some of the victims were found as far as 13 miles from the crater Based on a letter written to a close friend immediately after the eruption the author s personal narrative also chronicles the volcano s formation destruction and rebirth and is augmented by many diagrams and

photographs that have never before been published **In the Path of Destruction** Richard Waitt, 2020-10-14 A napping volcano blinked awake in March 1980 Two months later when that mountain roared Jim Scymanky was about twelve miles northwest logging a north slope above Hoffstadt Creek Rocks zinged through the woods bouncing off trees then the tops of trees snapped off Suddenly I could see nothing it got hot right away then scorching hot and impossible to breathe The air had no oxygen like being trapped underwater I was being cremated the pain unbearable Steve Malone at the University of Washington Seismology Laboratory was inconsolable We d failed For two months we d counted and located thousands of earthquakes looked for changes to anticipate an eruption Then it just happened It killed many people It killed David Johnston We could hardly work Author Richard Waitt was part of a U S Geological Survey team doing volcano research in the Cascades and was one of the first to arrive following the mountain s early rumblings His journey collecting eyewitness accounts began with a conversation in a bar the third week after Mount St Helens erupted The couple he met barely outraced a searing ash cloud and Waitt realized their experiences could inform geologic studies He eventually conducted hundreds of interviews sometimes two and three decades later often making multiple visits to gather additional details correct errors and resolve discrepancies A meticulous scientist with intimate knowledge of Mount St Helens Waitt delivers a detailed and accurate chronicle of events He tapped numerous primary sources interviews legal depositions personal diaries geologists field notes radio logs and police records Newspaper stories and even sun shadows on photographs revealed additional intricacies In the Path of Destruction s eruption story unfolds through unforgettable riveting narratives the heart of a masterful chronology that also delivers engrossing science history and journalism **Scott Foresman Reading**
