[I Speak for Earth](#) John Brunner,2011-09-29 One citizen of your planet shall go to the capital of the Federation of Worlds He shall live there for thirty days If your representative can survive and demonstrate his ability to exist in a civilized society with creatures whose outward appearance and manner of thinking differ from his own you will pass the test You will be permitted to send your starships to other planets of the galaxy If he fails the test if prejudice fear intolerance or stupidity trip him up then your world will be sealed off from the stars for ever This was the ultimatum from space The task before the world then was who shall go What man or woman could be found to take this frightening test for the whole of humanity and be certain not to fail First published 1961 *Timescoop* John Brunner,2011-09-29 A Pandora's box of evil Freitas had

commanded the engineers of his vast world wide empire to build him a device that could ransack the past Now all the riches of the ages were his for the taking But mere wealth was not what Freitas was after Supreme power was what he sought and from the past he picked the men and women who could help him gain absolute mastery over his rivals But one thing he had not reckoned on the power these creatures from the past would have over him the reign of terror about to begin **Muddle Earth Too Signed Edition** Paul Stewart,2011-09-01 **Storytelling in the Media Convergence Age** R. Pearson,A. Smith,2014-12-18 Why do screen narratives remain so different in an age of convergence and globalisation that many think is blurring distinctions This collection attempts to answer this question using examples drawn from a range of media from Hollywood franchises to digital comics and a range of countries from the United States to Japan *The Stardroppers* John Brunner,2011-09-29 A stardropper got its name from the belief that the user was eavesdropping on the stars But that was only a guess nobody really knew what the instrument did The instrument itself made no sense scientifically A conventional earpiece an amplifier a power source all attached to a small vacuum box an alnico magnet and a calibrated tuner What you got from all this was some very extraordinary noises and the conviction that you were listening to beings from space and could almost understand what you were hearing What brought Special Agent Dan Cross into the stardropper problem was the carefully censored news that users of the instrument had begun to disappear They popped out of existence suddenly and the world's leaders began to suspect that somehow the fad had lit the fuse on a bomb that would either destroy the world or change it forever First published 1972 **Building Imaginary Worlds** Mark J.P. Wolf,2014-03-14 Mark J P Wolf's study of imaginary worlds theorizes world building within and across media including literature comics film radio television board games video games the Internet and more Building Imaginary Worlds departs from prior approaches to imaginary worlds that focused mainly on narrative medium or genre and instead considers imaginary worlds as dynamic entities in and of themselves Wolf argues that imaginary worlds which are often transnarrative transmedial and transauthorial in nature are compelling objects of inquiry for Media Studies Chapters touch on a theoretical analysis of how world building extends beyond storytelling the engagement of the audience and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's Odyssey to the present internarrative theory examining how narratives set in the same world can interact and relate to one another an examination of transmedial growth and adaptation and what happens when worlds make the jump between media an analysis of the transauthorial nature of imaginary worlds the resulting concentric circles of authorship and related topics of canonicity participatory worlds and subcreation's relationship with divine Creation Building Imaginary Worlds also provides the scholar of imaginary worlds with a glossary of terms and a detailed timeline that spans three millennia and more than 1 400 imaginary worlds listing their names creators and the works in which they first appeared *The Rites of Ohe* John Brunner,2011-09-29 How short a time a century really is The speaker was Immortal Karmesin and he had lived a thousand

years He stood a gigantic figure against the rush of time a permanently open channel for the infants of the galaxy to explore the deep past He was anathema to the Phoenixes for their creed was that of birth in death of regeneration in destruction And he knew that he one man had to unravel the Phoenix mystery or live to watch it bring fiery death to all the planets of man
