It is a common observation that the American press is often characterized by a certain degree of bias and that certain news items are often omitted. This is a generalization, however, and it is not always true. The American press is a complex of many different organizations, each with its own interests and biases. It is not always true that the American press is biased, but it is true that it is often characterized by a certain degree of bias.

“I don’t believe there’s a single person here who’s not a member of a religious community,” says Robert Smith, an American, openly gay man and the nation’s first openly gay member of the U.S. government’s highest religious freedom body, the Council on American-Soviet Religious Freedom. “I’m not alone.”

There is also a growing concern that the teaching of basic literacy skills is being neglected in favour of more advanced skills. This is a concern that is shared by many of the teachers interviewed for this study. They feel that the focus on advanced skills has led to a neglect of the basic skills that are essential for a child's literacy development.
