Beauty Of Elementary Mathematics, The: And How To Teach It Ron Aharoni, 2024-07-30 Why is 2 times 3 equal to 3 times 2 One may think this is an axiom but it has a proof and a beautiful one at that Elementary mathematics is as deep and as beautiful as higher mathematics It includes some of the most important mathematical discoveries ever for example the concept of the number and the place value method of representing numbers We are so accustomed to this method that we forget how clever and beautiful it is resulting in its incredible efficacy All this was a surprise for the author a university professor of mathematics when he went to teach in elementary school He realized that good teaching of elementary mathematics requires understanding its fine points and conveying their beauty to the students Sensing the beauty and understanding go hand in hand The book outlines the material from kindergarten to grade 6 with an excursion into algebra as well It also discusses teaching principles and their close relatives thinking principles Teachers and parents who imbue these principles are likely to convey the love of mathematics to the child **Creative Writing in Post-Secondary**

**Education** Lisa Martin, 2025-02-20 A blend of memoir and scholarly review this book explores the kinds of thinking creative writing as a distinctly practical subject makes possible within post secondary education Taking the idea that creative writing should be grounded in practice Lisa Martin explores how the nature of the subject gives permission to think specifically locally from one's own position and in a necessarily limited way without having one's thinking discounted as lacking rigour as a result Modelling the deep and essential connection between practice and research in the field this book considers post secondary creative writing in its three key aspects artistic practice pedagogical practice and practice led research in order to articulate the distinctive contributions creative writing makes to what thinking means and whose thinking gets included Drawing on Martin's own artistic practice as well as more than a decade of pedagogical experience in creative writing this book braids together disciplinary history research informed autobiographical analysis of artistic practice and pedagogy and scholarly research in adjacent fields such as creativity studies and educational psychology Connecting creative writing's central commitment to artistic practice and local material embodied thinking with the development of learner centred pedagogies Creative Writing in Post Secondary Education is timely important and will spark spirited discussion within a debate that has been simmering since the inception of creative writing The Publishers' Trade List Annual , 1992
