Metcalf,2013-05-01 Do a Marina La Malinche Pocahontas Sacagawea their names live on in historical memory because these women bridged the indigenous American and European worlds opening the way for the cultural encounters collisions and fusions that shaped the social and even physical landscape of the modern Americas But these famous individuals were only a few of the many thousands of people who intentionally or otherwise served as go betweens as Europeans explored and colonized the New World In this innovative history Alida Metcalf thoroughly investigates the many roles played by go betweens in the colonization of sixteenth century Brazil She finds that many individuals created physical links among Europe Africa and Brazil explorers traders settlers and slaves circulated goods plants animals and diseases Intercultural liaisons produced mixed race children At the cultural level Jesuit priests and African slaves infused native Brazilian traditions with their own religious practices while translators became influential go betweens negotiating the terms of trade interaction and exchange Most powerful of all as Metcalf shows were those go betweens who interpreted or represented new lands and peoples through writings maps religion and the oral tradition Metcalf s convincing demonstration that colonization is always mediated by third parties has relevance far beyond the Brazilian case even as it opens a revealing new window on the first century of Brazilian history Medieval Frontiers: Concepts and Practices David Abulafia,Nora Berend,2017-03-02 In recent

years the medieval frontier has been the subject of extensive research But the term has been understood in many different ways political boundaries fuzzy lines across which trade religions and ideas cross attitudes to other peoples and their customs This book draws attention to the differences between the medieval and modern understanding of frontiers questioning the traditional use of the concepts of frontier and frontier society It contributes to the understanding of physical boundaries as well as metaphorical and ideological frontiers thus providing a background to present day issues of political and cultural delimitation In a major introduction David Abulafia analyses these various ambiguous meanings of the term frontier in political cultural and religious settings The articles that follow span Europe from the Baltic to Iberia from the Canary Islands to central Europe Byzantium and the Crusader states The authors ask what was perceived as a frontier during the Middle Ages What was not seen as a frontier despite the usage in modern scholarship The articles focus on a number of themes to elucidate these two main questions One is medieval ideology This includes the analysis of medieval formulations of what frontiers should be and how rulers had a duty to defend and or extend the frontiers how frontiers were defined often in

a different way in rhetorical ideological formulations than in practice and how in certain areas frontier ideologies were created The other main topic is the emergence of frontiers how medieval people created frontiers to delimit areas how they understood and described frontiers The third theme is that of encounters and a questioning of medieval attitudes to such encounters To what extent did medieval observers see a frontier between themselves and other groups and how does real interaction compare with ideological or narrative formulations of such interaction

Far From the Truth Michiel van Groesen, Johannes Müller, 2023-12-28 Information and knowledge were essential tools of early modern Europe's global ambitions This volume addresses a key concern that emerged as the competition for geopolitical influence increased how could information from afar be trusted when there was no obvious strategy for verification How did notions of doubt develop in relation to intercultural encounters Who were those in the position to use misinformation in their favour and how did this affect trust How in other words did distance affect credibility and which intellectual and epistemological strategies did early modern Europe devise to cope with this problem The movement of information and its transformations in the process of gathering ordering and disseminating makes it necessary to employ both a global and a local perspective in order to understand its significance The rise of print leading to various new forms of mediation played a crucial role everywhere inspiring theories of modernization in which media served as agents of new connections and eventually of globalization Paradoxically during the entire period between 1500 and 1800 the demise of distance through various strategies of verification coincided with constructions of otherness that emphasized the cultural and geographical difference between Europe and the worlds it encountered Ten leading scholars of the early modern world address the relationship between distance information and credibility from a variety of perspectives This volume will be an essential companion to those interested in the history of knowledge and early modern encounters as well as specialists in the history of empire and print culture The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license The

Great Cities in History John Julius Norwich, 2016-08-02 A portrait of world civilization told through the stories of the world's greatest cities from ancient times to the present. Today for the first time in history the majority of people in the world live in cities. The implications and challenges associated with this fact are enormous. But how did we get here? From the origins of urbanization in Mesopotamia to the global metropolises of today, great cities have marked the development of human civilization. *The Great Cities in History* tells their stories starting with the earliest from Uruk and Memphis to Jerusalem and Alexandria. Next come the fabulous cities of the first millennium: Damascus and Baghdad, Teotihuacan and Tikal, and Chang'an, capital of Tang Dynasty China. The medieval world saw the rise of powerful cities such as Palermo and Paris in Europe, Benin in Africa, and Angkor in southeast Asia. The last two sections bring us from the early modern world with Isfahan, Agra, and Amsterdam to the contemporary city: London and New York, Tokyo and Barcelona, Los Angeles and São Paulo. The distinguished contributors, including Jan Morris, Michael D. Coe, Simon Schama, Orlando Figes, Felipe Fernández Armesto, Misha Glenny, Susan Toby Evans, and A. N. Wilson, evoke the character of each place: people, art, and architecture, government, and explain the reasons for its success.
