Protecting Species And Habitats:

Protecting Species and Habitats Sue Barraclough, 2005 Features debates on key social and political issues in the 21st century Clearly set out with for and againsts on each question of debate Includes case studies and statistical data

Private Property and the Endangered Species Act Jason F. Shogren, 1998 To provide policy makers landowners and other stakeholders in the ESA debates with impartial baseline information this book offers multidisciplinary perspectives on the role that private property plays in protecting endangered species in the United States The opening chapter traces the evolution of the ESA and set forth the parameters of the debate over regulation of private property Four subsequent chapters explore the judicial and economic implications of ESA and suggest how issues of scale and diversity affect the implementation of the ESA on private property The volume concludes with eight principles to help frame the ongoing ESA reauthorization debate developed by the University of Wyoming's Institute for Environment and Natural Resources Policy Board the sponsor of the research presented in this book

Proactive Strategies for Protecting Species C. Josh Donlan, 2015-03-20 Now forty years old the Endangered Species Act ESA remains a landmark act in conservation and one of the world's most comprehensive laws designed to prevent species extinctions and support recovery efforts for imperiled species A controversial law and often subject to political attack the ESA is successful overall but not without difficulties Those who enforce the ESA for example struggle to achieve viable recovery goals for many species At the forefront of challenges is a reactive framework that sometimes leads to perverse incentives and legal battles that strain support and resources Further few species have been delisted Proactive Strategies for Protecting Species explores the perspectives opportunities and challenges around designing and implementing pre listing programs and approaches to species conservation This volume brings together conservation biologists economists private and government stakeholders and others to create a legal scientific sociological financial and technological foundation for designing solutions that incentivize conservation action for hundreds of at risk species prior to their potential listing under the ESA This forward thinking innovative volume provides a roadmap for designing species conservation programs on the ground so they are effective and take place upstream of regulation which will contribute to a reduction in lawsuits and other expenses that arise after a species is listed Proactive Strategies for Species Protection is a guidebook for anyone anywhere interested in designing programs that incentivize environmental stewardship and species conservation

The Habitats Directive in its EU Environmental Law Context Charles-Hubert Born, An Cliquet, Hendrik Schoukens, Delphine Misonne, Geert Van Hoorick, 2014-11-27 This book analyses the Habitats Directive one of the most prominent piece of EU environmental legislation of the past decades Seen by some as the cornerstone of Europe's nature conservation policy among other measures the Directive established the so called Natura 2000 ecological network which covers more than 18% of the surface of the EU However despite the fact the Directive was adopted over twenty years ago only 17% of the protected habitats and

species in Europe are being adequately protected while 10 60 % of animal species remain under threat In light of the limited success and the contested nature of the Habitats Directive so far this book examines the successes and failures of the Habitats Directive from a legal and political angle The book brings together international experts to consider the application implementation and future of the Habitats Directive in order to assess whether the Habitats Directive is resilient enough to tackle biodiversity loss in the twenty first century Particular emphasis is put on the legal regime attached to the Natura 2000 network and its possible impact on land development and the relationship between the Habitats Directive and other topics including liability for ecological damage and transboundary nature conservation

Montana Department of Natural Resources and Conservation, Forested State Trust Lands, Habitat Conservation Plan, 2010 *Nature Law and Policy in Europe* Andrew L. R. Jackson, 2023-04-26

This volume considers current and future challenges for nature law and policy in Europe Following the Fitness Check evaluation of the Birds and Habitats Directives in 2017 the EU adopted an Action Plan for nature people and the economy to rapidly improve the Directives implementation and accelerate progress towards the EU s biodiversity targets for 2020 More recently the EU has adopted a Biodiversity Strategy for 2030 and proposed an EU Nature Restoration Law This book makes a timely contribution by examining the current state of play in light of recent and historical developments as well as the post 2020 nature law and policy landscape While evidence suggests that Natura 2000 and the Habitats and Birds Directives have delivered conservation benefits for wildlife in Europe biodiversity loss continues apace The book reviews the requirements for an effective international nature conservation system with reference to the Birds and Habitats Directives It examines regulatory regimes current legal issues in the fields of site protection and species protection the protection of areas outside Natura 2000 recent developments in the EU and the UK including the implications of Brexit agriculture and nature conservation litigation science and access to justice Written by leading experts in the field from a range of stakeholder groups the volume draws on diverse experiences as well as providing interdisciplinary perspectives This volume will be essential reading for students scholars practitioners NGOs and policy makers interested in European environmental policy and law including for example lawyers ecologists environmental scientists political scientists natural resource managers planners and civil servants
