Matthew Holden, 2017-11-30 The National Political Science Review is the official publication of the National Conference of Black Political Scientists. The Review's purpose, as described by Matthew Holden in his introduction, is to lead to new information, insights, and findings into the social and political status of African Americans. The volume is not exclusionist or narrow. It integrates essays that could stand alone as they initially were written according to the method and theory of the author in question. As presented here, however, they also lend themselves to a broader treatment of race and the political order. The present volume combines essays expressly focused on African Americans, Africa, and the African diaspora. At the same time, it contains essays about broad generic subjects such as budgeting and interest groups, written with no explicit racial relevance. Holden integrates these essays under the theme of the changing racial regime. The integrating concept is the old word regime, which political scientists have used in many situations before to define such more or less persistent though not necessarily permanent orders of precedence. If no significant benefits and no significant burdens could be forecast by knowledge of the social identity called race, then the regime could be seen as non-racial. In American experience, the regime was at one time purposeful and sustained white advantage. The white race and its preferential standing was central to virtually all institutional practice, public and private. The significant contemporary question is the degree of change in the racial regime. Some proceed with the assumption that a large degree of change has occurred in the American political system. The view of other contributors is that the system still sustains racial stratification. In its very internal dialogue, this volume presents a panorama of current work by political scientists, African American and other, on the character of the American political system. Contributors include Cedric Robinson, Charles Henry, Edward J. Muller, Marjorie Lewis, Katherine A. Hinckley, and Bette S. Hill. Nancy Haggard, Gilson, and Vernon Johnson. The Changing Racial Regime is an essential resource for political scientists, black studies specialists, and scholars, and policy analysts of race relations in the United States.

Contours of African American Politics Georgia A. Persons, 2017-07-05 *Contours of African American Politics* chronicles the systematic study of African American politics and its subsequent recognition as an established field of scholarly inquiry. African American politics emanates from the demands of the prolonged struggle for black liberation and empowerment. Hence, the study of African American politics has sought to track, codify, and analyse the struggle that has been mounted and to understand the historic and changing political status of African Americans within American society. This two-volume set presents a selection of scholarship on African American politics as it appeared in *The National Political Science Review* from its initial launch in 1989 to the spring of 2009. Represented are contributions from some of the leading scholars of African American politics who have helped to establish and sustain the field. The volumes are organised around themes that derive from the unfolding real-life drama of African American politics and its subsequent scholarly treatment. The result is a window into the political efforts that meld the historically disparate strands of black political expressions into a reconstructed and strategically nimble electoral-based mass mobilisation necessary for optimising the impact of the African American vote.

Sections in the volumes also chronicle the evolution of the National Conference of Black Political Scientists as a professional organisation. The two volumes illuminate a pivotal epoch in black political empowerment and provide a context for the future of black politics. **(Re-)Mobilizing Voters in Britain and the United States** Gregory Benedetti, Veronique

Molinari, 2021-02-22 This collective work offers a historical approach to the issue of voters mobilisation and through case studies aims to expand the field's research agenda by taking into account less familiar mobilising strategies from various groups or parties both in Britain and the United States. Two different yet complementary approaches are used: one from the top down with political parties, the other from the bottom up with grassroots organisations to analyze how these groups either re-connect citizens with politics or give birth to social movements which durably occupy and change the political landscape of the United States and Britain. Black Women in Politics Michael Mitchell, 2017-09-29 The research included in this volume examines the competing pressures felt by black women as political agents in the domains of elections, public policy and social activism. Their challenges and initiatives are explored in public spaces, institutional behaviours and public policy. The volume features cutting edge research exploring black women's political engagement. The first group of contributors interrogates the treatment of black women within the discipline of political science. The second group examines the relationship between cultural politics and policymaking. The third and final group outlines the politics of race, gendered identity and black feminist practice. Black Women in Politics includes chapters on black leadership, radical versus moderate politics in New Orleans and the Shelby vs Holder Supreme Court decision. The editors introduce a new series highlighting trends in black politics. Finally, the work notes the passing of William Nick Nelson and Hanes Walton Jr, prominent members of the National Conference of Black Political Scientists. The Politics of Immigration in France, Britain, and the United States

M. Schain, 2008-11-10 This book argues that although labour market needs have been an important element in the development of immigration policy, they have been filtered through a political process: the politics of immigration. The book explores the relation between policy and politics in France, the UK and the US. *Governing the Metropolitan Region: America's New Frontier: 2014* David Y. Miller, Raymond Cox, 2015-01-28 This text is aimed at the basic local government management course, upper division or graduate, that addresses the structural, political and management issues associated with regional and metropolitan government. It also can complement more specialized courses such as urban planning, urban government, state and local politics and intergovernmental relations. *Laboratories Against Democracy* Jacob M.

Grumbach, 2023-08-15 Paperback printing Copyright date 2022 *Congress Reconsidered* Lawrence C. Dodd, Bruce I. Oppenheimer, 2016-12-16 For almost four decades the editors of *Congress Reconsidered*, Lawrence C. Dodd and Bruce I. This comprehensive study of African American politics since the civil rights era concludes that the black movement has been co opted marginalized and almost wholly incorporated into mainstream institutions **National Elections and the Autonomy of American State Party Systems** James Gimpel,2010-03-19 Traditional theories of party organization have emphasized two party electoral competition as the force behind party unity in state politics V O Key first advanced this theory in Southern Politics where he concluded that party factionalism in the South was mainly attributable to the one party character of the region But this traditional theory does not fit all states equally well In the states of the West especially parties are competitive but political activity is centered on candidates not parties The theory of candidate centered politics allows Gimpel to explain why party factionalism has persisted in many regions of the United States in spite of fierce two party competition Using interviews polling data elections returns and demographic information Gimpel contends that major upheavals in the two party balance of presidential voting may leave lower offices untouched **African American**

Perspectives on Political Science Wilbur Rich,2007-01-15 Race matters in both national and international politics Starting from this perspective African American Perspectives on Political Science presents original essays from leading African American political scientists Collectively they evaluate the discipline its subfields the quality of race related research and omissions in the literature They argue that because Americans do not fully understand the many faceted issues of race in politics in their own country they find it difficult to comprehend ethnic and racial disputes in other countries as well In addition partly because there are so few African Americans in the field political science faces a danger of unconscious insularity in methodology and outlook Contributors argue that the discipline needs multiple perspectives to prevent it from developing blind spots Taken as a whole these essays argue with great urgency that African American political scientists have a unique opportunity and a special responsibility to rethink the canon the norms and the directions of the discipline

The New American Political System Anthony King,1990 Everything is new in this second version of AEI s all time bestseller which brings coverage of the vital trends in American political life up to the present *Agrarian Structure and Political Power* Evelyne Huber, Frank R. economic analysis and to propose solutions Given the on going role of economics in government thinking on mitigation a constructive approach is vital if we are to deal adequately with climate change This volume will be of great interest to students and scholars of environmental ethics economics political science political philosophy and the philosophy of economics **Subject Guide to Books in Print** ,1997
