Red System Of The Cn Molecule:

RED SYSTEM OF THE CN MOLECULE. SUMNER P.. PHILLIPS DAVIS (JOHN G.),2021 *The Red System of the CN Molecule* Sumner P. Davis,1963 **RED SYSTEM OF THE CN MOLECULE.** SUMNER P.. PHILLIPS DAVIS (JOHN G.),2021 The Red System (A2[pi]--X2[sigma]) of the CN Molecule Sumner P. Davis,John Gardner Phillips,1963 **The Red System of the Cn Molecule** Sumner P. Davis,John G. Phillips,2013-09 **Molecular Spectra and Molecular Structure** K. Huber,2013-06-29 Since the publication in 1950 of Vol I Spectra of Diatomic Molecules of Molecular Spectra and Molecular Structure much progress has been made in the field While there have been some important refinements in the theory of diatomic molecular spectra most of the advances have been in the further exploration of individual spectra Not only has the number of molecules about which some spectroscopic data are available been increased by a factor of 2 to 3 but also the spectroscopic information about the molecules known in 1950 has been vastly extended This is due to the observation of new elec tronic states about three times as many as known before the enormous improvements in the accuracy of the constants of the states known in 1950 and the determination of higher order constants In view of the increasing use of spectroscopic information on diatomic molecules in other fields of physics in chemistry and in astrophysics it appeared desirable to prepare an up to date version of the table of molecular constants in the appendix of Vol I This updating proved to be far more time consuming than originally anticipated and it is only now 10 years that we are able to present such a table which instead after its initiation of the original 80 pages plus 30 pages of bibliography now fills a volume of 700 pages In the interest of economy and unlike the original version the new table has been produced by photo offset from the final manuscript **NASA Technical Translation** ,1969 **Technical Report - Jet Propulsion Laboratory, California Institute of Technology** Jet Propulsion Laboratory (U.S.), **Studies in Physical Gas Dynamics** ,1968 **Spectra of Atoms and Molecules** Peter F. Bernath,2020-04-20 This volume emphasizes the fundamental principles of spectroscopy and teaches students how to interpret spectra *The Swan System of the C2 Molecule* John G. Phillips,Sumner P. Davis,2023-11-15 NASA Technical Note ,1969 **Molecular Spectra and Molecular Structure - Vol I** Gerhard Herzberg,2013-04-18 I have endeavoured to give a presentation which is readable by the beginner in the field and also will be useful to those who do or want to do research work in this field In order to assist the former I have frequently made use of small type for those sections that are not necessary for an understanding of the fundamentals For the benefit of those working in the field numerous references to original papers have been included A satisfactory presentation of molecular spectra and molecular structure is nowadays not possible without treating thoroughly apart from the empirical results the theoretical background also Therefore I have included as much of the theory of molecular spectra as is possible without going into the more difficult mathematical details A large number of diagrams graphical representations of eigenfunctions and potential curves as well as energy level diagrams serve to illustrate and to explain the theory On the other hand I have

added numerous carefully selected spectrograms of bands and band systems some of which have been taken specially for this purpose in order to give an accurate idea of the experimental material that forms the basis of the developments

Handbook of Thermal Plasmas Maher I. Boulos,Pierre L. Fauchais,Emil Pfender,2023-02-20 This authoritative reference presents a comprehensive review of the evolution of plasma science and technology fundamentals over the past five decades One of this field s principal challenges has been its multidisciplinary nature requiring coverage of fundamental plasma physics in plasma generation transport phenomena under high temperature conditions involving momentum heat and mass transfer and high temperature reaction kinetics as well as fundamentals of material science under extreme conditions The book is structured in five distinct parts which are presented in a reader friendly format allowing for detailed coverage of the science base and engineering aspects of the technology including plasma generation mathematical modeling diagnostics and industrial applications of thermal plasma technology This book is an essential resource for practicing engineers research scientists and graduate students working in the field *Molecules and Radiation* Jeffrey I. Steinfeld,2005-06-10 This unified treatment introduces upper level undergraduates and graduate students to the concepts and methods of modern molecular spectroscopy and their applications to quantum electronics lasers and related optical phenomena Starting with a review of the prerequisite quantum mechanical background the text examines atomic spectra and diatomic molecules including the rotation and vibration of diatomic molecules and their electronic spectra A discussion of rudimentary group theory advances to considerations of the rotational spectra of polyatomic molecules and their vibrational and electronic spectra molecular beams masers and lasers and a variety of forms of spectroscopy including optical resonance spectroscopy coherent transient spectroscopy multiple photon spectroscopy and spectroscopy beyond molecular constants The text concludes with a series of useful appendixes **International Compendium of Numerical Data Projects** CODATA (The Committee on Data for Science and Technology ofthe International Council of Scientific Unions),2012-12-06 At the time of its establishment in 1966 by the International Council of Scientific Unions ICSU the Committee on Data for Science and Technol ogy CODATA was given the basic mission of promoting and encouraging on a worldwide basis the production and distribution of compendia and of collections of critically selected numerical data on substances other forms of interest and importance to science and technology To accomplish this aim the following tasks were assigned to CODATA 1 To ascertain on a worldwide basis what work on compilation of numerical data is being carried on in each country and under each union and from this information to prepare and distribute a Directory or Com pendium of the Data Compiling Projects and Related Publications of the World 2 To achieve coordination of existing programs and to recommend new programs 3 To encourage from all appropriate sources financial support for work on compilation 4 To encourage the use of internationally approved symbols units constants terminology and nomenclature 5 To encourage and coordinate research on new methods for preparing and disseminating data for science and technology In its first two years of operation 1966 to 1968 in Washington D c U S A CODATA fortunately

had as its Director Dr GUY WADDINGTON who was also Director of the Office of Critical Tables of the National Research Council NRC U S A Dr **Technical Papers** ,1964 Magnetic Atoms and Molecules William Weltner,1989-01-01 This comprehensive graduate level text by a leading researcher in atomic and molecular spectroscopy explores the electron spin resonance theory of randomly oriented molecules I recommend it highly American Scientist 119 illustrations **Evolution of Peculiar Red Giant Stars** International Astronomical Union. Colloquium,1989-06-22 Red giant stars are evolutionarily advanced objects in the closing stages of their nuclear burning lifetime Observed with increasing spectral coverage they display a variety of unusual phenomena Many are characterized by peculiar non solar surface chemical compositions which provide otherwise unobtainable clues to interior nucleosynthesis mixing and evolution Others may have received their chemical peculiarities by mass transfer from a companion This book reports on the proceedings of the International Astronomical Union Colloquium 106 It contains discussions on many aspects of these stars combining theory and observation to interpret these objects in terms of their evolutionary history There are 20 review papers 69 abstracts and short contributed papers and a complete transcript of the valuable summary panel discussion Professional astronomers will find this book useful as a reference work which incorporates current research on the modelling and evolution of these unstable stars **Contributions from the McDonald Observatory, Fort Davis, Texas, ...** McDonald Observatory,1947
