Research and Policy Committee,1979-07-01 Redefining Government's Role in the Market System ,1979 The Market System, Structural Change, and Efficient Economies Bodo B. Gemper, This volume s aim is to promote thought in readers interested in what kind of economic policies market systems welfare systems and socialist systems should each pursue under the pressures of accelerating change Should there be more government or less government This is the central question addressed by this internationally drawn group of experts The book features major case studies on the People s Republic of China Canada Ghana Great Britain South Africa Taiwan and West Germany Contributors include Richard L Brinkman from the United States James C W Ahiakpor and Tillo E Kuhn from Canada Dieter Loesch and Herbert Schmidt from Germany and Geert L deWet from South Africa For technical economists interested in world trade business people concerned with expanding markets and policy analysts concerned about how technology culture and politics drive economic systems this book is essential reading As the editor points out indicative targeting as the latest weapon in the arsenal of economic science makes it possible to systematically discover signals that could become points of reference landmarks for the way into the future The approach taken by the authors enables us to trace future trends by extrapolating current data onto new territory It will help the policy maker identify desirable trends and ideas and at the same time provides some early warning signals about high risk trends and patterns Bodo B Gemper is professor of economics at the University of Siegen in Germany He previously edited a Transaction volume *Structural Dynamics of Industrial Policy* and in German *Protectionism in the World Economy*

Economic Management and Transition Towards a Market Economy Anthony T.H. Chin,1996 Much attention has been focused in recent years on the transformation of the economies of Eastern and Central Europe and the former Soviet Union However a growing demand for policy advice technical assistance and expertise is also coming from Asian reforming countries such as China Mongolia Vietnam Laos and Cambodia In addition business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries Such developments are too important to overlook or ignore The transformation of socialist economies towards market based systems entails an unusually wide range of problems Studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents Although the structural features of Asian reforming economies are in important ways different from those of the Eastern European economies all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues This volume brings together a rich collection of expertise and information in an

attempt to shed some light on the transitional process in Asia The contributions are by no means exhaustive However they provide the reader and analyst with an excellent starting point to the problems and prospects which are specific to Asian transforming economies *Hearings, Reports and Prints of the House Committee on the Budget* United States. Subcommittee on Administrative Practice and Procedure,1980 **DREAM OF DELIVERANCE** Mona Harrington,2013-08-21 In this major work of historical and political analysis Mona Harrington examines curcial missteps and uncertainties in the American statecraft from Woodrow Wilson s time to Ronald Reagan s and traces them to a potent myth at the center of our political thinking It is a myth peculiarly American a long held belief that the troubles of society can be traced to some specific evil be it a profiteering in munitions or the multinational corporation or the communist conspiracy or wasteful social programs and that by smiting the evil we can achieve social well being for all The author demonstrates how deeply this dream of deliverance has been rooted in American culture from the very beginnings of the nation in the concept of a society in which conflicts between groups of widely divergent interests can be resolved without undeserved loss to any party We see the consequences of this belief in our continuing tendency to oversimplify issues both domestic and foreign and in our obsessive expenditure of public energy on the search for and pursuit of the evil to be exorcised The dilemma is further exacerbated because the country s three major economic interest groups industrial wage earners industrial owners and managers and the cluster of interests tied to local economies are prone to demonologies as widely divergent as their interests and there can seldom be agreement as to the identity of the evil How this bondage to the dream of deliverance has affected the functioning of American government making our politics a never ending argument whose terms have scarcely changed over the past century is brilliant explicated Connecting the deepest workings of statecraft to what we know about the dynamics of our own individual lives this highly original book leads us away from a myth driven politics and toward a difficult encounter with reality toward liberation from the endless search for the serpent whose defeat with return us to Eden toward a national recognition that in conditions of conflict it is not always possibly for all to emerge as winners toward the shaping of a politics that will enable us to allocate in the most decent possible way the losses that we cannot avoid Consumerism, 4th Ed. David A. Aaker,1982-02 The new edition of this highly acclaimed anthology continues to provide the most

comprehensive rigorously balanced survey available of modern consumerism Written by a wide range of experts the 42 articles half of them new to this edition cover today s most important consumer and public policy issues advertising and the disclosure of consumer information selling practices anti trust issues and competition product safety liability and consumer satisfaction As in previous editions the articles are arranged according to the steps in the purchase process New to this edition are detailed discussions of such current issues as the costs and benefits of government regulation advertising to children consumer information systems and demarketing encouraging consumers to use less of such products as tobacco and energy The final section assesses the response of business and industry to consumer pressures

Corporate Social Responsibility Oliver F. Williams,2013-11-26 Over the last 30 years corporate social responsibility CSR has become a household term reflecting a combination of factors that we have come to associate with that most catch all of terms globalization including the widespread popular concern with such social issues as the environment and international human rights Corporate Social Responsibility examines the history of the idea of business ethics which goes back at least to ancient Mesopotamia before exploring the state of CSR today This book argues that a wide ranging understanding of the purpose of business is necessary to create value for a community of stakeholders which in turn can generate a sustainable future The book suggests that corporations still have a long way to go but remains optimistic The book s sanguine interpretation of the current state of corporate affairs and a recommended way forward results not only from the authors analysis but also his direct experience This book presents the case that we are in the midst of a major paradigm shift in our understanding of the purpose of business and that this new understanding holds much promise for business being a significant force for a more just and peaceful world This work provides a concise overview of CSR and an important examination of the present and future work of the UN Global Compact and will be of interest to students of international organizations international business and corporate social responsibility

Myth of Liberal Ascendancy G. Williams Domhoff,2015-11-17 Based on new archival research G Williams Domhoff challenges popular conceptions of the 1930 s New Deal Arguing instead that this period was one of increasing corporate dominance in government affairs affecting the fate of American workers up to the present day While FDR s New Deal brought sweeping legislation the tide turned quickly after 1938 From that year onward nearly every major new economic law passed by Congress showed the mark of corporate dominance Domhoff accessibly portrays documents of the Committee s vital influence in the halls of government supported by his interviews with several of its key employees and trustees Domhoff concludes that in terms of economic influence liberalism was on a long steady decline despite two decades of post war growing equality and that ironically it was the successes of the civil rights feminist

environmental and gay lesbian movements not a new corporate mobilisation that led to the final defeat of the liberal labour alliance after 1968
