This title includes Foreword by Sheila Kitzinger Writer Researcher Activist and Honorary Professor Wolfson School of Health Sciences Thames Valley University Birth centres are suitable for every woman whose birth is straightforward which accounts for around 75 per cent of all women This inspirational guide shows how small scale maternity provision has a profound clinical and organisational advantage over large scale hospital provision including saving of time and money by reducing intervention rates It presents the thoughts and feelings of midwives and patients and how both enjoy the humane and compassionate care of the birth centre ethos The book is invaluable for midwives obstetricians doulas maternity care assistants and maternity service planners and managers It also provides enlightening information for general practitioners and other health and social care professionals maternity service users groups and academics with an interest in midwifery and health services What birth centres do best is simply providing humane childbirth care There are no high tech gadgetry doctors or dramatic stories of childbirth rescues that make it into the media Yet miracles happen inside their walls every day as women have their babies after normal labours and births Until now there have been very few books detailing what happens in birth centres so that women and childbirth professionals can be introduced to an alternative beyond the large hospital model This book provides a window in on the birth centre model and there are some exciting things to find there about childbirth care in the 21st century Denis Walsh in the Preface Denis Walsh has one of the most incisive analytical and brilliant minds in nursing and midwifery research today He demonstrates

the difference between a quality environment for birth where a woman can create her own nest and a technocratic bureaucratically controlled highly medicalised and risk oriented birth culture dominated by the clock which is most women's experience today Sheila Kitzinger in the Foreword Inappropriate Bodies Art, Design and Maternity Buller Rachel Epp, 2019-09-01 This edited collection examines conflicting assumptions expectations and perceptions of maternity in artistic cultural and institutional contexts Over the past two decades the maternal body has gained currency in popular culture and the contemporary art world with many books and exhibitions foregrounding artists' experiences and art historical explorations of maternity that previously were marginalized or dismissed In too many instances however the maternal potential of female bodies whether realized or not still causes them to be stigmatized censored or otherwise treated as inappropriate cultural expectations of maternity create one set of prejudices against women whose bodies or experiences do align with those same expectations and another set of prejudices against those whose do not Support for mothers in the paid workforce remains woefully inadequate yet in many cultural contexts social norms continue to ask what is wrong with women who do not have children In these essays and conversations artists and writers discuss how maternal expectations shape both creative work and designed environments and highlight alternative ways of existing in relation to those expectations

Hennessey, 2018-12-11 Every human being is born and has gone through a process of birth Yet the topic of birth remains deeply underrepresented in the humanities overshadowed by a scholarly focus on death This book explores how imagery is used ritualistically in religious secular and nonreligious ways during birth through analysis of a wide variety of art iconography poetry and material culture Objects central to the book s study include religious figurines paintings about birth and other items representative of pregnancy crowning or giving birth that have an historical or original meaning connected to religion Contemporary artists are also creating new art in which they represent birth and mothering as nonreligious events that are sacred or divine Framed through the concept of social ontology which examines the nature of the social world and studies how people create meaning out of the various objects images and processes that make up human social life the book theorizes a social ontology of birth focusing on how the meaning of imagery undergoes metamorphosis between the spheres of religion secularity nonreligion and the sacred when used during birth as a rite of passage Included in the study are more than thirty images of birth some of which have never been written about before **Oh Baby** Kathy Fray, 2016-02-29 Much recommended by new mothers this is the only book you ll need for the best baby advice Now completely revised and updated Refreshingly honest openly frank and candidly blunt this book has been written by a mother who is also an experienced midwife for other mothers It oozes warm fuzzies exudes realism in every paragraph and is refreshing in its guiltless honesty Modern first time mothers are often alone devoid of once traditional motherhood knowledge and practical support Often previously self confident women find themselves isolated fumbling over everyday mothering tasks enduring sleep deprivation feeling desperately despondent and aching and leaking everywhere

This book provides supportive caring advice one mum to another while at the same time serving as an encyclopaedic medical reference regarding the mother and baby. Checked thoroughly by medical professionals, this book is a unique blend like having access to a kind and gentle GP as well as to all the gems of wisdom of years of mothers' coffee groups. This title clearly and compassionately explains the ups as well as the downs, which are perfectly normal aspects of giving birth and mothering in today's society.

Lying in the Dark Room Emma Cheadle, 2023-12-01. Lying in the Dark Room: Architectures of British Maternity returns to and reflects on the spatial and architectural experience of childbirth through both a critical history of maternity spaces and a creative exploration of those we use today. Where conventional architectural histories objectify buildings in parallel with the objectification of the maternal body, the book in the mode of creative practice research presents a creative critical autotheory of the architecture of lying in. It uses feminist subjective modes of thinking that travel across disciplines, registers and arguments. The book assesses the transformation of maternity spaces from the female bedchamber of seventeenth and eighteenth century marital homes to the lying in hospitals of the eighteenth and nineteenth centuries, purposely built by men, midwives to the late twentieth century spaces of home and the modern hospital maternity wing and the parallel shifts in maternal practices. The spaces are not treated as mute or neutral backdrops to maternal history but as a series of vital, entangled atmospheres, materials, practices and objects that are produced by and in turn produce particular social and political conditions, gendered structures and experiences. Moving across spaces, systems, protagonists and their subjectivities, the book shows how hospital design and protocol altered ordinary birth at home and continues to shape maternal spatial experience today. As such, it will be of interest to a wide range of readers from architectural historians, theoreticians, designers and students to medical humanities historians, to English Literature, humanities and material studies scholars as well as those interested in creative critical writing.
