The Great Redesign Matthias Schrader,Volker Martens,2021-01-18 We live in a world that s constantly redesigned Today s redesign is tomorrow s vintage look But times of crisis rapidly change the picture Suddenly the whole world is in dire need of a proper redesign From capitalism to communication from work to supply chains from cities to office space it s hard to find an area of our lives that s not due for an overhaul This is a challenge but also a huge opportunity to design a better world Edited by Matthias Schrader and Volker Martens With contributions by Payal Arora Axel Averdung Kristina Bonitz Azeem Azhar Genevieve Bell Amy McLennan Benedict Evans Daisy Ginsberg Rafael Kaufmann Sohail Inayatullah David Mattin Miriam Meckel L a Steinacker Thomas M ller Ramez Naam Tijen Onaran Pamela Pavliscak Ben Sauer La titia Vitaud Albert Wenger

Supply Chain Redesign Robert B. Handfield,Ernest L. Nichols (jr.),2002 The authors identify key emerging trends and drivers in supply chain management introduce powerful new strategies for redesigning supply chains and present comprehensive global case studies showing how Nortel and General Motors have transformed their own supply chains to optimize value and drive out costs

Process Redesign for Health Care Using Lean Thinking David I.

Ben-Tovim,2017-03-16 Process Redesign for Health Care Using Lean Thinking is a response to a simple but hard to answer question and is the result of the experiences of a working doctor who was also the chief safety and quality officer of an Australian teaching hospital At this hospital he observed that the Emergency Department was staff by talented well trained

and respected doctors and nurses The facilities were modern and the work load unexceptional but the department was close to melt down Bad things were happening to patients everyone was blaming each other lots of things had been tried but nothing was getting better and no one could explain why The problem was not a lack of technical knowledge or expertise the problem was that no one stood back and said what s the best way to move 200 or 300 patients a day through the complicated and varying sequence of steps needed to sort out the many different problems that bring patients to our department These challenges are faced by hospitals and health services all over the world There are difficulties with patient flow congestion queues inefficient utilization of resources problems engaging clinical staff in improvement programs adverse incidents and budget constraints Lean thinking and value stream analysis gives hospitals and health services struggling with these issues the insights they need to help themselves This book provides a method that systematically turns those insights into working programs of service and system redesign The book is divided into two sections The first section gives the background to the approach and systematically works through the Process Redesign methodology step by step The second section is a series of case studies that show the methodology in action what worked and what didn t work The goal of any process redesign is simple the right care for the right person at the right time in the right place and right the first time This book helps the people who work in hospitals and health services realize these goals by working together **eBusiness and Workplace**
