Reducing Gun Violence, 2001 **Reducing Gun Violence** David M. Kennedy, 2001 **Reducing Gun Violence** National Institute of Justice (U.S.), 2001 , *Policing Gun Violence* Anthony Allan Braga, Philip J. Cook, 2023 In many U S cities gun violence is the most urgent crime problem High rates of deadly violence make a city less livable dragging down quality of life economic development and property values Drawing on fifty years of research and practical experience *Policing Gun Violence* argues that it is possible for the police to create greater public safety while respecting the rights of individuals and communities Anthony A Braga and Philip J Cook identify the most beneficial evidence based practices offering a comprehensive guide for deploying the authority and considerable resources of the police to reduce gun violence **The 13 Critical Tasks: An Inside-Out Approach to Solving More Gun Crime** Peter Gagliardi, 2019-09-16 This book describes the people processes and technologies needed to extract actionable intelligence from the inside and outside of crime guns

The Communitarian Reader Amitai Etzioni, Drew Volmert, Elanit Rothschild, 2004 The Communitarian Reader Beyond the Essentials brings together essays by prominent social thinkers reflecting on issues ranging from moral obligations to civil liberties after 9 11 The result is a book both practical and theoretical and an essential guide for all interested in further exploring this important social movement **Trial and Error in Criminal Justice Reform** Greg Berman, Aubrey Fox, 2016-03-21 In this revised edition of their concise readable yet wide ranging book Greg Berman and Aubrey Fox tackle a question students and scholars of law criminology and political science constantly face what mistakes have led to the problems that pervade the criminal justice system in the United States The reluctance of criminal justice policymakers to talk openly about failure the authors argue has stunted the public conversation about crime in this country and stifled new ideas It has also contributed to our inability to address such problems as chronic offending in low income neighborhoods an overreliance on incarceration the misuse of pretrial detention and the high rates of recidivism among parolees Berman and Fox offer students and policymakers an escape from this fate by writing about failure in the criminal justice system Their goal is to encourage a more forthright dialogue about criminal justice one that acknowledges that many new initiatives fail and that no one knows for certain how to reduce crime For the authors this is not a source of pessimism but a call to action This revised edition is updated with a new foreword by Cyrus R Vance Jr and afterword by Greg Berman **Handbook of Quantitative Criminology** Alex R. Piquero, David Weisburd, 2009-12-16 Quantitative criminology has certainly come a long

way since I was first introduced to a largely qualitative criminology some 40 years ago when I was recruited to lead a task force on science and technology for the President's Commission on Law Enforcement and Administration of Justice. At that time criminology was a very limited activity depending almost exclusively on the Uniform Crime Reports (UCR) initiated by the FBI in 1929 for measurement of crime based on victim reports to the police and on police arrests. A typical mode of analysis was simple bivariate correlation. Marvin Wolfgang and colleagues were making an important advance by tracking longitudinal data on arrests in Philadelphia, an innovation that was widely appreciated. And the field was very small. I remember attending my first meeting of the American Society of Criminology in about 1968 in an anteroom at New York University; there were about 25-30 people in attendance, mostly sociologists with a few lawyers thrown in. That Society today has over 3,000 members, mostly now drawn from criminology, which has established its own clear identity but augmented by a wide variety of disciplines that include statisticians, economists, demographers, and even a few engineers. This Handbook provides a remarkable testimony to the growth of that field. Following the maxim that if you can't measure it, you can't understand it, we have seen the early dissatisfaction with the UCR replaced by a wide variety of new approaches to measuring crime victimization and offending.

Cities for Life Jason Corburn, 2021-11-16. In cities around the world, planning and health experts are beginning to understand the role of social and environmental conditions that lead to trauma. By respecting the lived experience of those who were most impacted by harms, some cities have developed innovative solutions for urban trauma. In *Cities for Life*, public health expert Jason Corburn shares lessons from three of these cities: Richmond, California; Medellín, Colombia; and Nairobi, Kenya. Corburn draws from his work with citizens' activists and decision makers in these cities over a ten-year period as individuals and communities worked to heal from trauma, including from gun violence, housing, and food insecurity, poverty, and other harms. *Cities for Life* is about a new way forward with urban communities that rebuilds our social institutions, practices, and policies to be more focused on healing and health.

More God, Less Crime Byron Johnson, 2011-05-15 In *More God Less Crime* renowned criminologist Byron R Johnson proves that religion can be a powerful antidote to crime The book describes how faith communities congregations and faith based organizations are essential in forming partnerships necessary to provide the human and spiritual capital to effectively address crime offender rehabilitation and the substantial aftercare problems facing former prisoners There is scattered research literature on religion and crime but until now there has never been one publication that systematically and rigorously analyzes what we know from this largely overlooked body of research in a lay friendly format The data shows that when compared to current strategies faith based approaches to crime prevention bring added value in targeting those factors known to cause crime poverty lack of education and unemployment In an age of limited fiscal resources Americans can't afford a criminal justice system that turns its nose up at volunteer efforts that could not only work better than the abysmal status quo but also save billions of dollars at the same time This book provides readers with practical insights and recommendations for a faith based response that could do just that
