Bowen, Hugh Chalmers, 2012-08-21 The 9 11 terrorist attacks prompted a new urgency in efforts to deal with chemical biological radiological and nuclear proliferation The potential acquisition and use by terrorist groups of such weaponry was suddenly a much increased threat The G8 Global Partnership against the Spread of Weapons and Materials of Mass Destruction subsequently encouraged some twenty two countries and the European Union to pledge up to 20 billion to address this challenge The creation of the Global Partnership was the first time so many countries agreed to collaborate on a

range of non proliferation security and nuclear safety programmes as well as commit such an amount of resources to them Based on extensive primary research this Whitehall Paper assesses the success and shortcomings to date of the Global Partnership and suggests how the mechanism can be bolstered and taken forward **Reducing Threats at the Source** , At their meeting in Kananaskis Canada in June 2002 the Heads of State and Government of the G8 countries announced a Global Partnership Against the Spread of Weapons and Materials of Mass Destruction Global Partnership to provide assistance to states in the first instance the Russian Federation that lack the means to implement shared disarmament non proliferation and counter terrorism object The EU is represented by the President of the European Commission and by the leader of the country that holds the presidency of the European Council at the time of the G8 summit meeting To the extent that armed conflict and state collapse in the developing world are recognized to contribute to the causes of and openings for terrorism the relationship of the stockpiles and flows of small arms and light weapons SALW to such conflicts also draws projects to secure and destroy SALW into the sphere of relevance The scope for projects in the area of practical disarmament and under the auspices of the PFP seems to be a particularly wide given the progressively expanded technical coverage of CTR For example the commission is the only actor that participates in all of the G8 the Northern Dimension including NDEP and MNEPR the European Nuclear Cities Initiative ENCI the ISTC and the STCU The European Union's Nuclear Non-proliferation Policy Manuel Herrera,2025-04-15 This book looks at European Union EU attempts to manage the risks associated with nuclear non proliferation and assesses its performance and external challenges The introductory section delves into current academic scholarship elucidating the concepts of contestation and performance The second section provides an overview of the historical and institutional evolution and the third scrutinizes the performance The final section examines present policy with case studies on the EU s bilateral relations with Iran and India Adopting a focus on both the development and performance of the EU s non proliferation and disarmament policy as well as its contestation from non Western countries this book provides a solid and innovative contribution to existing debates on both the EU s non proliferation and foreign policy The book will appeal to scholars researchers and practitioners of International Relations European Union Studies and Nuclear Non Proliferation as it provides an analysis of the intricacy of the EU s non proliferation policy offering fresh perspectives and empirical evidence **U.S. Cooperative Threat Reduction and Nonproliferation Programs** United States. European Security, Terrorism and Intelligence C. Kaunert, S. Leonard, 2013-05-07 The EU has long been seen as confederation that has failed to assert itself effectively on the international stage In this collection a series of experts discuss how the EU has shed its reputation as a weak international actor in light of its policies on police cooperation and intelligence sharing as part of the global effort to combat terrorism

The Nordic Countries and the European Security and Defence Policy Alyson J. K. Bailes, Gunilla Herolf, Bengt Sundelius, 2006 In 1999 the EU decided to develop its own military capacities for crisis management This book brings together a group of experts to examine the consequences of this decision on Nordic policy establishments as well as to shed new light on the defence and security issues that matter for Europe as a whole

Ethics and Law for Chemical, Biological, Radiological, Nuclear & Explosive Crises Dónal P. O'Mathúna, Iñigo de Miguel Beriain, 2019-04-25 This book provides a current analysis of the legal and ethical challenges in preparing for and responding to chemical biological radiological nuclear and explosive CBRNE crises From past events like the Chernobyl nuclear incident in Russia or the Bhopal chemical calamity in India to the more recent tsunami and nuclear accident in Japan or the Ebola crisis in Africa and with the on going threat of bioterrorism the need to be ready to respond to CBRNE crises is uncontroversial What is controversial is whether we are on a path that adequately prepares us for the next event The ethical and legal scholars in this volume hold that much work remains to be done and offer this book to stimulate further reflection and dialogue around CBRNE crises This is an indispensable book for both students and scholars of bioethics international law public health as well as for regulators and administrators developing policy and legislation related to public health planning and emergency responses

Denationalisation of Defence Janne Haaland Matlary, Øyvind Østerud, 2016-05-23 Denationalisation of Defence consists of two major parts first a generic and analytical section which presents the developmental trends in privatization and internationalization of armed force and second an empirical section analyzing the impact of these trends on the Nordic countries defence and security sectors The Nordic countries have a special relevance as objects of study given their traditionally strong public spheres and state orientated systems of governance This volume questions whether the process of

denationalization has reached a point where countries are reacting to changes in their security environment by increasingly introducing elements of privatization and international integration

European Security Governance and the European Neighbourhood after the Lisbon Treaty Christian Kaunert, Sarah Léonard, 2013-09-13 The EU has often been considered to be a weak security actor However any assessment of the EU's role in international security is underpinned by a specific understanding of security This book is based on a broad understanding of security We consider that security concerns are increasingly triggered by challenges such as terrorism climate change mass migration flows and many other non traditional security issues This book tries to capture these aspects of the EU's fast changing security policies following the entry into force of the Lisbon Treaty on 1 December 2009 There are several common themes stemming from a combined reading of the chapters Firstly the EU has sought to simultaneously pursue its security objectives and spread its values such as democracy the rule of law and human rights by encouraging reforms in its neighbourhood However it is increasingly evident that there are tensions and contradictions between these two objectives which can be illuminated and better understood by considering another strand of literature with which there has been little engagement in EU studies to date namely the literature on human security This book is the first to analyse these hugely topical developments in European security after the Lisbon Treaty It was published as a special issue of Perspectives on European Politics and Society

SIPRI Yearbook 2008 Stockholm International Peace Research Institute, 2008 The 39th edition of the SIPRI Yearbook analyses developments in 2007 in Security and conflicts Military spending and armaments Non proliferation arms control and disarmament The SIPRI Yearbook contains extensive annexes on the implementation of arms control and disarmament agreements and a chronology of events during the year in the area of security and arms control
