Linear Planning to Reduce Regional Inequality Rossella Moscarelli, 2023-04-24 This book explores the advantages of a linear model of planning in reducing regional inequalities. Linear planning, commonly discussed in the past as a method which plans the development of the city, is completely redefined here in the form of a design approach inspired by projects shaped by linear routes such as cycle or walking paths. Such concept is applied to the urgent topic of territorial marginality which specifically neglects rural and mountainous areas and recently is coped by European and National policies. The analysis of these policies demonstrates the necessity of alternative strategies equipped to deal with both the internal and external causes that determine the critical conditions in these fragile environments. By implementing the concept of linear planning in these contexts, this book proposes to enlarge the perspective of traditional policies contrasting the regional inequalities that usually determine the design of projects just within the boundaries of the marginal areas. Cycle and walking paths are experimental cases of linear planning as they have not been influenced or formed by political boundaries and therefore are able to equally involve both the central and marginal zones. This book presents a review of current issues such as regional inequalities with attention to their related policies as well as an analysis of the concept of linear planning as seen through the study of one of the most famous cases of a walking path: the Way of St James in Spain.

Territorial Division for Public Action Antoine Laporte, Antonine Ribardi re, 2025-05-13 The reader may be amazed when they are faced with the sheer number of territorial divisions associated with public action and full of questions: What justifies this diversity? What are the problems that arise from these divisions? Why don't the limits of public action simply follow administrative and political subdivisions? Territorial Division for Public Action focuses on the situation in France, proposing three different approaches. First, we consider the functions that are associated with these territorial divisions: equitable distribution of resources across the territory, administration and the management of public services. However, they are also a tool for maintaining power. Lastly, we consider the effects these divisions have on the implementation of public action and on socio-spatial structures. These divisions reflect political projects which embody the issues as much as the partition design itself does. The recent reform of territorial regions alongside a gradual imposition of intercommunal links in France has given rise to political debates at both local and national levels.

The Constitutional Framework for Enhanced Cooperation in EU Law Robert B ttner, 2021-02-15 Enhanced Cooperation allows a group of Member States to use the EU's competences and institutions to pursue a project within the Union's framework that is binding only on the participating States while remaining an EU act. Introduced by the Amsterdam Treaty, this tool of flexible integration was not used until 2010. In *The Constitutional Framework for Enhanced Cooperation in EU Law*, Robert B ttner analyses the primary law framework of this flexibility tool. On the basis of a profound literature review and against the

background of recent Member State practice the author redefines the constitutional rules of Enhanced Cooperation He draws conclusions on this tool's legal limits but also its potential for European integration *Political geography, geopolitics and territorial management: Brazilian perspectives* Gutemberg de Vilhena Silva, 2023-04-29 This book aims to contribute to debates in the fields of political geography geopolitics and territorial management from the point of view of authors who work in Brazilian universities in the five regions of the country

Development and Territorial Restructuring in an Era of Global Change Elisabeth Peyroux, Christine Raimond, Vincent Viel, Emilie Lavie, 2023-08-22 Thinking about development and the environment simultaneously is one of the biggest scientific and societal challenges of the 21st century Understanding the interactions between biophysical systems and human activities in an era of global change requires overcoming disciplinary divides and opening up new epistemological perspectives This book explores these challenges using a territorial lens Combining various scales of analyses from global to local and contexts both urban and rural in the North and in the South it analyzes the relationships between environment and development through a variety of geographical objects i.e. cities rural and agricultural areas coastlines watershed themes i.e. ecological transitions food energy transport agriculture mining activities and methodologies i.e. qualitative and quantitative approaches modeling in situ measurements By engaging in a dialogue between social science and natural science disciplines within different fields and with a variety of forms of knowledge production this book provides essential information for understanding and reading the complexity of a globalized world This book is targeted at academics and students in social sciences and at stakeholders in the field of territorial and environmental management

The Development of a Comprehensive Legal Framework for the Promotion of Offshore Wind Power Anton Ming-Zhi Gao, Chien-Te Fan, 2016-04-24 There is clearly an urgent need worldwide to increase the share of renewable energy in the overall energy supply as rapidly as possible With a well developed and proven feasible technology offshore wind power has come to the fore as the most promising means of achieving this goal However fragmented authorities and procedures may pose tremendous challenges to the development of an integrated legal framework for offshore wind and the complex installation and grid interconnections it requires This book surveys and analyses the features essential for the development of such a framework drawing on the experience of ten countries that have such schemes in place France Germany the United Kingdom Italy Norway the United States Australia China Korea and Taiwan Discussing the impact of technological economic spatial and market issues on the legal framework eleven key policymakers in their respective countries contribute chapters that together reveal the contours of a strong and sound legal framework that serves to enable and facilitate the efficient application of policy initiatives and subsidies Topics and issues raised and examined include the ways a sound legal framework addresses the following aspects of offshore wind power development license schemes construction of turbines infrastructure of grid construction harbor and vessels environmental health and safety regulations and loan and finance risk The contributors show that a carefully planned mix of incentives and

supplementary schemes is indispensable The essays are drawn on the presentations and papers offered at the International Conference on a Comprehensive Legal Framework for the Development of Offshore Wind Power Around the World held in Taiwan in August 2016 As a major new contribution to the debate on the importance of a legal framework for offshore wind power and grid interconnections this book will prove indispensable to lawyers policymakers officials and academics concerned with the management of sea space to include the wind power necessary to achieve and sustain renewable energy goals

Territorial Inequalities Magali Talandier,Josselin Tallec,2024-01-11 Spatial planning has embraced the idea of dealing with territorial inequalities by focusing on equipment logic on a national scale and then economic development on a local scale Today this issue is creating new angles of debate with strong political resonances e g Brexit French gilets jaunes movement Interpretations of these movements are often quick and binary such as the contrast between metropolises and peripheries between cities and the countryside between the north and the south or between the east and the west of the European Union Territorial Inequalities sheds light on the social political and operational implications of these divergences The chapters cover the subject at different scales of action and observation from the neighborhood to the world but also according to their interdependences To deal with such a vast and ambitious theme the preferred approach is that of territorial development in terms of public policy namely spatial planning

Portable Prisons James Gacek,2022-01-15 The pervasiveness of surveillance punishment and control within and outside of spaces such as jails prisons and detention centres suggests that the carceral is becoming an increasingly prevalent presence in our lives going beyond historical standards The contemporary use of electronic monitoring extends carceral territory beyond prison walls into people s homes and everyday lives Empirically and empathetically driven Portable Prisons is a telling exploration of the electronic monitoring of offenders based on an ethnographic case study from Scotland Electronic monitoring must be understood in both intent and effect as a carceral practice an expression of the carceral state and its overreaching punitive capabilities James Gacek demonstrates that various people experience punishment by means of restrictions around mobility space and time in ways that strongly overlap with the reported experiences of interviewed prisoners Drawing attention to how the neoliberal state outsources the labour of punishment to private corporations and the punished themselves he also rejects the idea that soft punishment is in any way related to the movement for decarceration Offering an original contribution to our understanding of the geography of incarceration Portable Prisons is a sophisticated account of electronic monitoring underlining the growing significance of

this field **Spatial Framework and Economic Development** Shri Kamal Sharma, 2000 Interrelationship between spatial structure and scenario of development is the focal theme of this volume. Attributes of the environment, man, his culture and society and their interaction shape the spatial structure which ultimately determine the pace of development. Unless transferential approach of resource exploitation is not changed to transformational one, it is difficult to reduce the glaring disparity in development. Transformational approach is people oriented and nature oriented development concept in which social justice, welfare, quality of life and environmental protection are kept at par with the economic growth.
