

Shattered Reflections

A woman with light-colored hair is holding a white, rectangular object, possibly a piece of paper or a small mirror, in front of her face. She is looking down at the object with a focused expression. The background is a dense field of red, feathery foliage, likely Japanese maple leaves, which are slightly out of focus. The overall mood is contemplative and artistic.

Reflections A Novel Of Suspense:

The Reflection Hugo Wilcken, 2015-09-01 Hugo Wilcken's first novel *The Execution* a taut psychological mystery about an average person who commits an accidental murder got the kind of rave reviews authors dream of. He was compared to Camus and Hitchcock. Now in his second novel *The Reflection* the comparisons seem even more appropriate. It's a smart creepy steadily absorbing mystery about an average law abiding citizen who finds himself inexplicably caught up in a case of mistaken identities with one of his own patients. When psychiatrist David Manne is asked by a friend who's a New York City Police detective to consult on an unusual case he finds himself being asked to evaluate a criminal who's the exact opposite of himself an uneducated laborer from the Midwest who seems overwhelmed by modern day Manhattan circa 1948. But when that laborer tells David that he's not who the police say he is David slowly begins to believe it may be true. Unable to stop himself David begins to look into how the police handle the man and the hospital they take him to and begins to suspect that the man is caught up in some kind of secret governmental medical testing. Realizing he's got to rescue his patient David quickly finds himself battling forces that seem to be even bigger than he suspected and that now have him in their sights. When he suddenly finds himself caught with a patient's ID papers on him he decides on a risky course that seems his only way out. To change his identity and enter even deeper into the conspiracy if he's to find out how to escape it. Written in relentlessly probing prose with a delicious plot complication seemingly on every page this is one of the most thought provoking chilling and suspenseful novels you'll ever read.

Novel Environments Jayne Hildebrand, 2023-05-31 The environment concept has shaped humanity's relationship to the natural world and has drawn attention to the effects of human actions on our natural surroundings But when did we learn that we live in an environment While scholars have often located the emergence of the environment concept in twentieth century ecological and political thought *Novel Environments* Science Description and Victorian Fiction reconstructs a longer and a specifically literary history It was in the descriptive worldmaking of the Victorian novel that the environment was first transformed from an abstraction into a vivid object of imagination and feeling Engaging the scientific theories of their contemporaries Mary Russell Mitford George Eliot Thomas Hardy and Robert Louis Stevenson turned to detailed description from gardens and landscapes to weather and atmospheres to model interactions between life and its surroundings Far from merely furnishing static background the descriptive apparatus of the Victorian novel imagined the nonhuman environment as dynamically involved with human action feeling and development In making this argument *Novel Environments* recovers the scientific vocabulary the Victorians used to name the surroundings of living organisms The word environment dominates our

own way of speaking about the nonhuman world but nineteenth century scientific writers and novelists availed themselves of a richer conceptual lexicon which included environment along with less familiar concepts such as milieu medium and circumstance Jayne Hildebrand traces the development of Victorian environmental thought from the earliest theorization of physical surroundings as a dynamic influence in the life sciences through the idea of a singular medium in mid century organicism to the conception of the planet as an environmental system at the fin de siècle By showing how novelistic description helped to produce the modern environment concept Hildebrand sheds new light on the relationship between Victorian literature and the life sciences and reveals how literary form has shaped the ecological ideas through which we apprehend the nonhuman world
