Reflections On History And Historians:

Reflections on History and Historians Theodore S. Hamerow, 1991

Theodore S. Hamerow, 1987 History as a field of learning is in a state of crisis It has lost much of its influence in institutions of higher learning and its place in public esteem Historians have in large part lost touch with the intelligent lay reader and with the undergraduate college student History's value to society is being questioned In this work a distinguished historian views the profession to which he has been devoted for more than thirty years Theodore S Hamerow's learned observations will be welcomed by all historians and by those involved in the management of higher education and should be required reading for all graduate students in history Far from being a sentimental look at the past Hamerow's work confronts the unpleasant reality of the present History he says flatly is a discipline in retreat The profession is in serious trouble and there are no signs that its problems will be resolved in the foreseeable future After identifying the current crisis Hamerow proceeds to trace the development of the profession over the last hundred years and to examine its characteristics in modern society In this section of the book he shares some fascinating practical observations on the ways in which the profession operates Hamerow explains why some historians rise to prominence while others do not He also examines causes of the dissatisfactions that afflict many historians and their students Hamerow also examines the way in which academic historians live their lives as he expands on the daily realities that they face He then explains how those realities have shaped scholarship and led to the new history The broad use of social science methods he observes has had the effect of isolating the new historians from traditional historians indeed from one another Couched in the arcane prose of machine readable languages says Hamerow history has become inaccessible to the intelligent lay reader who had once read historical works with interest understanding and appreciation In concluding his examination Hamerow asks What is the use of history It has long been a favorite question asked by historians but seldom one over which they agonized for very long After considering various arguments for the usefulness of historical investigation Hamerow offers his own justification There are times says Hamerow when even the most spontaneous or instructive cultural pursuits need to be examined in the light of the purposes they serve and the goals they seek Now might be a good time for all historians to take a long look at the direction their discipline has taken in the past century at the functions it has come to perform and at the serious dilemma it now faces Hamerow is a steady and helpful guide to any such examination

To America Stephen E. Ambrose,2002 When Stephen Ambrose became intersted in American history at age 18 there was much that America had done that made him proud but there were some things he condemned as well for instance slavery the treatment of Native Americans racist Southern politicians the Robber Barons of the transcontinental railroad the use of the atomic bomb All through his undergraduate and graduate years from 1953 1960 Ambrose learned such ideas from his professors and believed and then taught them himself when he became a teacher of history in 1960 But after reasearching and writing about the Civil War in graduate school Eisenhower in the 60s Crazy Horse and Custer Lewis and Clark Nixon the transcontinental railroad and World War II over the next three decades Ambrose s views on American history changed In his new book the renowned historian celebrates America s spirit and confronts its failures and struggles As always in his much acclaimed work Ambrose brings alive the men and women famous and not who have peopled history and made the United States the superpower it is now On Doing Local History Carol Kammen,1986 **Mirrors of Time** William M. Whitley,1992 The Purpose of the Past ,2008 History is to society what memory is to the individual without it we don t know who we are and we can t make wise decisions about where we should be going But while the nature of memory is a constant the nature of history has changed radically over the past forty years for good but also for ill Historian Wood examines the sea change in the field offers insight into what historians do and how they can stumble *The Purpose of the Past* Gordon S. Wood,2008 Wood examines how the historian s craft has changed radically over the past 40 years This work offers insight into what great historians do how they can stumble and what strains of thought have dominated the marketplace of ideas in historical scholarship **Reflections on the History of Art** Ernst Hans Gombrich,1987-01-01 Essays discuss Greek and Chineese art Da Vinci Michelangelo Dutch genre painting Rubens Rembrandt art collecting museums and Freud s aesthetics **Essays on history, particularly the Jewish, Assyrian, Persian, Grecian, and Roman, etc** John HOLLAND (of Bolton-in-the-Moors.),1815 Essays on French History and Historians John Stuart Mill,1985-12-15 J S Mill s deep interest in French intellectual political and social affairs began in 1820 when in his fourteenth year he went to France to live for a year with the family of Sir Samuel Bentham French became his second language and France his second home where he died and was buried in 1873 His interest in history began even earlier when as a child of seven he tried to imitate his father s labours on the History of British India though he never wrote a history in his maturity study of the past remained a passion and helped shape the philosophy of history that informed his views of society and ethics His intense interest in contemporary French politics also led him to seek connections between historical developments and present trends both seen by his from a Radical perspective appropoate to what he believed to be an age of transition The English historians of France including Walter Scott and Thomas Carlyle as well as the French some of whom were themselves political figures are judged by their historical methods but those methods are seen as having practical effects in shaping as

well as revealing the mind of the times This volume brings together for the first time the essays running from 1826 to 1849 that meld these abiding interests They give as well insights into Mill s personal aspirations his developing view of comparative politics and sociology his concern for freedom and his feminism During these years Mill worked on a published his System of Logic Book VI of which shows in condensed form the results of the speculations here developed reading these essays with that work which made his reputation as a philosopher enables one to see the effects of romanticism on analytic thought in a way not as clearly evident even in Mill s Autobiography Independently important then the essays in this volume also enable us to interpret anew the practical and theoretical concerns fundamental to his formative years and maturity John C Cairns Introduction demonstrates how the essays reveal through their reactions to the Revolutions of 1789 1830 and 1848 and to French historiography politics and thought the effect of France on Mill s ideas and also the way in which his other concerns influenced his reactions to France The texts with the variants and notes that are the hallmark of this edition are described in John M Robson s Textual Introduction which explains the editorial principles and methods *Kate Ryan ,*

History Under Debate Lawrence J Mc Crank, Carlos Barros, 2013-05-13

Examine new trends in the writing of new history and what they mean to information science. History has been devalued causing a lack of career prospects for historians a decrease in vocations to the history profession and historical discontinuity between generations.

History Under Debate International Reflection on the Discipline is a recap of the crucial Second International Historia a Debate conference held on July 17 1999 in Santiago de Compostela. This book details the comparative critical perspectives on history historians their audiences and the coming trends that will inevitably impact information science. The in depth examination provides innovative approaches to historians as they redefine their discipline in relation to the global society of the new millennium while presenting invaluable insights for librarians social scientists and political scientists.

History Under Debate International Reflection on the Discipline examines how the writing of history in the twenty first century is revitalized by international comparative historiography thanks to new technologies and the multinational integration processes in economy politics culture and academics. The first section discusses the Historia a Debate HaD Forum and Movement detailing the need for change to restore history as a vital global subject in modern times. The remainder of the book consists of reflective and comparative views on the study of history and historiography as well as history in and about Spain and its relation to the rest of the world. The book explores new ways for moving the discipline beyond sources and source criticism alone to a different concept of the historical profession as a science with a human subject that discovers the past as people construct it. Included in this book is the English translation of the HaD Manifesto a proposal designed to unify historians of the twenty first century and ensure a new dawn for history its writings and its teachings.

History Under Debate International Reflection on the Discipline includes vital discussions on Linguistic Turn Postmodernism and Deconstruction gender studies and social history objectivity and subjectivity in historical interpretation multiple views of history from differing times and places history as criticism literature and reconstruction.

History Under Debate International Reflection on the Discipline is an essential resource that teaches historians librarians social scientists and humanists how to use cross border development and new global historiographic networks to bring hope for a future in history.

What Is History Really About? Peter Burke, 2018-01-31

This volume gathers Professor Burke's most important essays on the theory and the practice of history. In the first part the main theme is the way in which concepts borrowed from social and cultural theory may encourage historians to ask new questions about the past or help them to answer old ones. The second part of the author's

work is to illustrate some major new trends in historical practice the use of images as evidence for instance the interest in different attitudes to time and the increasing awareness of the relation close or distant between historians and the past that they study

History, Historians, and Autobiography Jeremy D. Popkin, 2005-05-09 Though history and autobiography both claim to tell true stories about the past historians have traditionally rejected first person accounts as subjective and therefore unreliable What then asks Jeremy D Popkin in *History Historians and Autobiography* are we to make of the ever increasing number of professional historians who are publishing stories of their own lives And how is this recent development changing the nature of history writing the historical profession and the genre of autobiography Drawing on the theoretical work of contemporary critics of autobiography and the philosophy of Paul Ricoeur Popkin reads the autobiographical classics of Edward Gibbon and Henry Adams and the memoirs of contemporary historians such as Emmanuel Le Roy Ladurie Peter Gay Jill Ker Conway and many others he reveals the contributions historians life stories make to our understanding of the human experience Historians autobiographies he shows reveal how scholars arrive at their vocations the difficulties of writing about modern professional life and the ways in which personal stories can add to our understanding of historical events such as war political movements and the traumas of the Holocaust An engrossing overview of the way historians view themselves and their profession this work will be of interest to readers concerned with the ways in which we understand the past as well as anyone interested in the art of life writing
