Regards To The Man In The Moon:

Regards to the Man in the Moon Ezra Jack Keats, 2009-05-28 When the other kids make fun of Louie and call his father the junkman his dad explains that the so called junk he loves can take you right out of this world with a little imagination So Louie builds the spaceship Imagination I and blasts off into his own space odyssey Reissued just in time for the fortieth anniversary of the first lunar landing this fantastical Keats adventure celebrates the power of imagination

Shoemaker by Levy - The Man Who Made an Impact David H. Levy, 2002-11-24 It was a lucky twist of fate when in the early 1980s David Levy a writer and amateur astronomer joined up with the famous scientist Eugene Shoemaker and his wife Carolyn to search for comets from an observation post on Palomar Mountain in Southern California Their collaboration would lead to the 1993 discovery of the most remarkable comet ever recorded Shoemaker Levy 9 with its several nuclei five tails and two sheets of debris spread out in its orbit plane A year later Levy would be by the Shoemakers side again when their comet ended its four billion year long journey through the solar system and collided with Jupiter in the most stunning astronomical display of the century Not only did this collision revolutionize our understanding of the history of the solar system but it also offered a spectacular confirmation of one scientist's life work As a close friend and colleague of Shoemaker who died in 1997 at the age of 69 Levy offers a uniquely insightful account of his life and the way it has shaped our thinking about the universe Early in his training as a geologist Shoemaker suspected that it wasn't volcanic activity but rather collisions with comets and asteroids that created most of the craters on the moon and most other bodies in the solar system Convincing the scientific community of the plausibility of impact theory and revealing its power for penetrating mysteries such as the extinction of the dinosaurs and the timing of the Earth's eventual demise became Shoemaker's mission Through conversations with Shoemaker and his family Levy reconstructs the journey that began with a young geologist's serious desire to go to the moon in the late 1940s Sent by the government to find a way to harvest plutonium Shoemaker instead found evidence in desert craters for what became his impact theory While he never became an astronaut he did become the first geologist hired by NASA and subsequently set the research agenda for the first manned lunar landing After a series of victories and setbacks for Shoemaker the collision of Shoemaker Levy 9 with Jupiter provided the most convincing proof to date of the role of impacts in our solar system Levy's explanation of the scientific reasoning that guided Shoemaker in his career up to this dramatic point as well as his personal portrait of a man who found white water rafting to be an easy way to relax sets these fascinating events in a human scale This biography shows what Shoemaker's legacy will be for our understanding of the story of the Earth well into the twenty first century Texas School Journal , 1884 The London

Stimpson,Gilbert Herdt,2022-12-22 Gender systems pervade and regulate human lives in law courts and operating rooms ballparks and poker clubs hair dressing salons and kitchens classrooms and playgroups Exactly how gender works varies from culture to culture and from historical period to historical period but gender is very rarely not at work Nor does gender operate in isolation It is linked to other social structures and sources of identity So write women s studies pioneer Catharine R Stimpson and anthropologist Gilbert Herdt in their introduction to *Critical Terms for the Study of Gender* laying out the wide ranging nature of this interdisciplinary and rapidly changing field The sixth in the series of *Critical Terms* books this volume provides an indispensable introduction to the study of gender through an exploration of key terms that are a part of everyday discourse in this vital subject Following Stimpson and Herdt s careful account of the evolution of gender studies and its relation to women s and sexuality studies the twenty one essays here cast an appropriately broad net spanning the study of gender and sexuality across the humanities and social sciences Written by a distinguished group of scholars each essay presents students with a history of a given term from bodies to utopia and explains the conceptual baggage it carries and the kinds of critical work it can be made to do The contributors offer incisive discussions of topics ranging from desire identity justice and kinship to love race and religion that suggest new directions for the understanding of gender studies The result is an essential reference addressed to students studying gender in very different disciplinary contexts
