Social Media on the Road Oskar Juhlin, 2010-09-08 In the future everyday life in traffic will be intricately meshed with city life Today motorways cities and streets are places where we spend a considerable amount of time and where a large number of everyday encounters between people occur Any road user's journey coincides with hundreds or even thousands of others This book unpacks the details of the practical achievements involved in socially engaging with people at high speed Although generally speaking these encounters are brief and interaction is slight the recent emergence of mobile technologies offers opportunities to support drivers and passengers beyond just helping them to reach their destination New social media could enhance interaction in traffic making life on the road more interesting and meaningful Such innovative applications could include car stereos that share music amongst drivers digital games that interact with the landscape passing outside the car windows or with passengers in surrounding cars message systems that allow drivers to help each other and web applications that allow motorcyclists to socialize on the road Social Media on the Road The Future of Car Based Computing provides a bridge between research in transport planning and traffic technology and new media areas such as Computer Human Interaction and Computer Supported Cooperative Work Those studying and researching in the areas of human computer interaction in mobile use contexts and those interested in developing new forms of mobile applications and services will find this book an excellent resource Oskar Juhlin is Associate Professor and Director of the Mobile Life VinnExcellence Centre at Stockholm University and Interactive Institute This book represents a pioneering and key research work that examines the future of transportation being merged with communication and interactive media It also provides a glimpse of the future potential of mixed reality entertainment for children and family on the move It is essential for scientists designers and engineers working on mobile social media as well as for business people looking for new potential urban transport media services Professor

Behavioural Adaptation and Road Safety Christina Rudin-Brown, Samantha Jamson, 2013-05-24 Despite being an accepted construct in traffic and transport psychology the precise nature of behavioural adaptation including its causes and consequences has not yet been established within the road safety community A comprehensive collection of recent literature Behavioural Adaptation and Road Safety Theory Evidence and Action explores behavioural adaptation in road users It examines behavioural adaptation within the context of historical and theoretical perspectives and puts forth tangible and practical solutions that can effectively address adverse behavioural adaptation to road safety interventions before it occurs Edited by Christina Rudin Brown and Samantha Jamson with chapters

authored by leading road safety experts in driver psychology and behaviour the book introduces the concept of behavioural adaptation and details its more relevant issues It reviews the definition of behavioural adaptation that was put forward by the OECD in 1990 and then puts this definition through its paces identifying where it may be lacking and how it might be improved This sets the context for the remaining chapters which take the OECD definition as their starting points The book discusses the various theories and models of behavioural adaptation and more general theories of driver behaviour developed during the last half century It provides examples of the evidence for behavioural adaptation instances in which behavioural adaptation arose as a consequence of the introduction of safety countermeasures The book then focuses on the internal human element and considers countermeasures that might be used to limit the development of behavioural adaptation in various road user groups The book concludes with practical tools and methodologies to address behavioural adaptation in research and design and to limit the potential negative effects before they happen Supplying easy to understand accessible solutions that can be implemented early on in a road safety intervention s design or conception phase the chapters represent the most extensive compilation of literature relating to behavioural adaptation and its consequences since the 1990 OECD report The book brings together earlier theories of behavioural adaptation with more recent theories in the area and combines them with practical advice methods and tangible solutions that can minimise the potential negative impact of behavioural adaptation on road user safety and address it before it occurs It is an essential component of any road safety library and should be of particular relevance to researchers practitioners designers and policymakers who are interested in maximizing safety while at the same time encouraging innovation and excellence in road transport related design *Traffic Safety Culture* Nicholas John Ward, Barry Watson, Katie Fleming-Vogl, 2019-04-12 This book provides traffic safety researchers and practitioners with an international and multi disciplinary compendium of theoretical and methodological concepts relevant to the research and application of Traffic Safety Culture aiming towards a vision of zero traffic fatalities
