Integrating SOA and Web Services N. Sudha Bhuvaneswari, S. Sujatha, 2011-06-30 This

book highlights how to integrate and realize Service Oriented Architecture with web services which is one of the emerging technologies in IT. It also focuses on the latest technologies such as Metadata Management, Security issues, Quality of Service and its commercialization. A chapter is also devoted to the study of Emerging standards and development tools for Enterprise Application Integration. Most enterprises have made extensive investments in system resources over the course of many years. Such enterprises have an enormous amount of data stored in legacy enterprise information systems (EIS) so it is not practical to discard existing systems. It is more cost effective to evolve and enhance EIS. This could be done with the help of SOA realizing with web services which is an emerging field in Information technology. SOA is usually realized through web services. Web services specifications may add to the confusion of how to best to utilize SOA to solve business problems. In order for a smooth transition to SOA using an architectural style that helps in realizing web services through SOA. The book concentrates on this architecture realization and integration of SOA with web services. It consists of 12 chapters and is recommended for all postgraduate Computer Science Students.

Linking the Construction Industry. National Research Council, Federal Facilities Council, Board on Infrastructure and the Constructed Environment, 2000-08-31. Public agencies, private corporations, nonprofit institutions and other organizations regularly invest millions of dollars in acquiring buildings and other constructed facilities to support their lines of business. For this investment the owner receives a complex structure composed of hundreds of separate but interrelated components including roofs, walls, foundations, electrical, plumbing, heating, air conditioning, ventilation, fire, communication, safety and architectural systems. These components and systems must all be maintained and repaired to optimize the facility's performance throughout its service life and to provide a safe, healthy and productive environment for its users and occupants. *Linking the Construction Industry: Electronic Operation and Maintenance Manuals* is a summary of a workshop that was held at the National Academy of Sciences in Washington, D.C. on October 13, 1999. The workshop, planned and organized by the Federal Facilities Council and the National Institute of Building Sciences, brought together an invited audience of building

industry stakeholders including owners and operators from federal agencies and other organizations building component and system manufacturers publishers of building product data and maintenance manuals and CMMS software developers to revisit the issue of electronic operation and maintenance manuals
