Why do My Skin Tones Look Lifeless? Plus 25 Solutions to Other Portrait Painting Peeves Rachel Shirley, 2013-08-05. Learn how to mix skin colours, paint hair and techniques for painting eyes in this oil painting book. Portrait painting is often seen as the last frontier of representational art as every detail has huge consequences upon whether a portrait looks like the person depicted. The beginner need not venture far before encountering a possible minefield of problems. Common issues might be why a portrait painting looks childish, eyes look like marbles, hair looks like a wig or noses appear skewed. Such frustrations and many others might be encountered by professional and amateur portraitists alike whether it is to capture the highlights in eyes or to make skin tones appear three-dimensional. It is all part of learning to paint. If the issue persists, however, the problem is likely to become a creative block in portraiture. This is where this book comes in. Each issue is tackled candidly and in depth, consisting of a description of the issue, concerned suggested solutions, via the art materials required and painting exercises. In total 26 peeves associated with portraiture are tackled within this book. A myriad of other matters relating to portraiture are explained, including suggested pigments to use for ethnic subjects, painting from life, portrait photography and more, in total with countless colour images. Sections I and II within the aftermatter of this book provides step by step demonstrations for first-time explorers of skin tones. Some of the images within this book can be found in my other Oil Painting Medic Book, Portrait Painting in Oil Ten Step by Step Guides from Old Masters. Other images have been sourced from my fine art paintings and commissions. My other book on portraiture, Portrait Painting in Oil 10 Step by Step Guides, offers in-progress demos on painting old master subjects such as that from Botticelli, Rossetti, Vermeer, Gauguin and more. Dimensions of large edition 10x8in and 84 pages. The author has a BA Hons Degree in Fine Art from London as well as a PCET teaching qualification from Warwick.

attention **Lever's Histopathology of the Skin** David E. Elder, Rosalie Elenitsas, Bernett L. Johnson, George F. Murphy, 2009 Lever's Histopathology of the Skin is a classic comprehensive work that has been used by generations of dermatopathologists, pathologists and dermatologists to further their knowledge in their current practices and in the training of their students. The pathophysiologic organization is based on Walter Lever's original scheme with appropriate modifications over the years and is more efficient than the pattern method since related entities are discussed in juxtaposition. This edition contains over 1,400 full color illustrations including photomicrographs and clinical photographs of diseases not covered in previous editions. The chapter on algorithmic pattern recognition has been expanded and extensively cross referenced to the chapters on diseases to aid readers in generating differential diagnoses for unknown cases.
