## Shadow On The Moon:

*The School Journal*, 1907      **In the Shadow of the Moon** Anthony F. Aveni, 2017 In anticipation of solar eclipses visible in 2017 and 2024 an exploration of the scientific and cultural significance of this mesmerizing cosmic display Since the first humans looked up and saw the sun swallowed by darkness our species has been captivated by solar eclipses Astronomer and anthropologist Anthony Aveni explains the history and culture surrounding solar eclipses from prehistoric Stonehenge to Babylonian creation myths to a confirmation of Einstein's theory of general relativity to a spectacle that left New Yorkers in the moon's shadow to future eclipses that will capture human imaginations In one accessible and engaging read Aveni explains the science behind the phenomenon tracks eclipses across the ancient world and examines the roles of solar eclipses in modern times to reveal the profound effects these cosmic events have had on human history Colored by his own experiences Aveni has witnessed eight total solar eclipses in his lifetime his account of astronomy's most storied phenomenon will enthrall anyone who has looked up at the sky with wonder      The Mechanism of the Heavens; Or, Familiar Illustrations of Astronomy. of relevance in Physics are provided After a brief introduction to elementary electromagnetic theory it is reformulated as a theory in four dimensions using tensors in Chapter 6 Finally in Chapter 7 the theory is extended to deal with accelerated motion as corrections to Special Relativity Memoirs of the Royal Astronomical Society Royal Astronomical Society,1879
