Decolonizing Politics Robbie Shilliam, 2021-02-18 Political science emerged as a response to the challenges of imperial administration and the demands of colonial rule. While not all political scientists were colonial cheerleaders, their thinking was nevertheless framed by colonial assumptions that influence the study of politics to this day. This book offers students a lens through which to decolonize the main themes and issues of political science, from human rights and citizenship to development and global justice. Not content with revealing the colonial legacies that still inform the discipline, the book also introduces students to a wide range of intellectual resources from the post-colonial world that will help them think through the same themes and issues more

expansively Decolonizing Politics is a much needed critical guide for students of political science It shifts the study of political science from the centers of power to its margins where the majority of humanity lives Ultimately the book argues that those who occupy the margins are not powerless Rather marginal positions might afford a deeper understanding of politics than can be provided by mainstream approaches

Elenes,2010-11-15 *Transforming Borders* Chicana o Popular Culture and Pedagogy contributes to transformative pedagogies scholarship by adding the voices of Chicana feminist pedagogies epistemologies and ontologies C Alejandra Elenes develops her conceptualizations of border transformative pedagogies by linking the relationship between cultural practices knowledge and teaching in everyday life She analyzes Chicana feminist cultural workers educational actors reimagining three Mexican figures La Llorona the weeping woman the Virgen of Guadalupe and Malintzin Malinche as epistemological and pedagogical meanings The three figures represent multiple meanings traditional views on femininity religion and nationalist views on women yet at the same time feminists have reimagined these three figures and developed counter narratives that can offer alternatives to the traditional meanings In developing border transformative pedagogies Elenes looks at the significance of historical events such as the creation of the Mexico U S border to understand the experiences of people of Mexican descent

in the United States She also examines oral histories of the legend of La Llorona in the Southwest historical documents on the Spanish conquest of Mexico and Chicana artists such as Ester Hernandez Yolanda Lopez Consuelo Jimenez Underwood and Alma Lopez re imagining of the Virgen of Guadalupe The conflicts over the meanings of the three figures can help us understand how Chicanas have used their voices to counter economic and gender inequalities and how pedagogical practices show that cultural productions are sites where forms of domination can be contested and recreated in ways that allow for the creation of alternative identities and subjectivities
