Arguments and Fists Mika LaVaque Manty, 2002-03-22 Many theorists have addressed a central concern of current political theory by contending that the dithering intellectualism of left politics prevents genuine political action *Arguments and Fists* confronts this concern by refuting these arguments and reconciling philosophical debates with the realities of current activism By looking at theorists such as Montesquieu Kant Rousseau the book contradicts current academic debates and also goes against contemporary theory's image of the liberal political agent as a narrowly rational abstraction Mika LaVaque Manty also argues that progressive political philosophy and political action go hand in hand He then ventures past Kant and Rousseau to talk about specific environmental activism finding middle ground between the two while asserting that the liberal urge for political reform stems from sound philosophical considerations about the nature of politics and isn't the cowardly afterthoughts some

theorists have called it Arguments and Fists then puts these theoretical insights to use examining environmental justice movements and varieties of environmental radicalism showing how liberal theory illuminates concrete contemporary political practices **Management and Administration** ,1923

is a hot topic in present day research Thirdly it proposes a principled way to respond to criticism of thought experimenting by experimental philosophers as they have been dominating the present day debates The response suggests a possible ameliorative self help project for thought experimenting Finally the book provides a way to systematize the history of important thought experiments in science and philosophy and thus connects in an original way the systematic investigation of experimenting to the historical work of famous thought experiments It is of interest to scholars interested in history of ideas and philosophy of science
