Looking At Culture:

Thinking About Morality Bernie Koenig, 2021-02-23 Thinking about Morality addresses the processes behind how we resolve moral issues and the factors that can impact that such as differing values and cultures Moral disagreements are primarily due to differing values or the clash of new knowledge with old values When trying to resolve a moral dispute we must carefully define the issue We must bring to bear relevant knowledge which can be used to resolve the issue but sometimes the value structures are so different that an issue cannot be resolved This book provides an examination of how values operate and how one's obligations will differ in different cultures This book addresses topics such as multiculturalism along with immigration and migration sex and gender abortion and euthanasia environmental issues guns and drugs

A Culture of Growth Joel Mokyr, 2016-10-25 Why Enlightenment culture sparked the Industrial Revolution During the late eighteenth century innovations in Europe triggered the Industrial Revolution and the sustained economic progress that spread across the globe While much has been made of the details of the Industrial Revolution what remains a mystery is why it took place at all Why did this revolution begin in the West and not elsewhere and why did it continue leading to today's unprecedented prosperity In this groundbreaking book celebrated economic historian Joel Mokyr argues that a culture of growth specific to early modern Europe and the European Enlightenment laid the foundations for the scientific advances and pioneering inventions that would instigate explosive technological and economic development Bringing together economics the history of science and technology and models of cultural evolution Mokyr demonstrates that culture the beliefs values and preferences in society that are capable of changing behavior was a deciding factor in societal transformations Mokyr looks at the period 1500-1700 to show that a politically fragmented Europe fostered a competitive market for ideas and a willingness to investigate the secrets of nature At the same time a transnational community of brilliant thinkers known as the Republic of Letters freely circulated and distributed ideas and writings This political fragmentation and the supportive intellectual environment explain how the Industrial Revolution happened in Europe but not China despite similar levels of technology and intellectual activity In Europe heterodox and creative thinkers could find sanctuary in other countries and spread their thinking across borders In contrast China's version of the Enlightenment remained controlled by the ruling elite Combining ideas from economics and cultural evolution *A Culture of Growth* provides startling reasons for why the foundations of our modern economy were laid in the mere two centuries between Columbus and Newton

Postmodern Management Theory Marta B. Calás, Linda Smircich, 2019-01-15 First published in 1997 this volume asks when was The Postmodern in the History of Management Thought Marta B. Calás and Linda Smircich have chosen this subtitle as entry point to the collection for several reasons The first and most evident is that it prompts us to reflect on the inclusion of a volume on postmodern organization studies within a series of books on the history of management thought What does such inclusion signal Are we saying that we are past the postmodern in organization studies That we have transcended modernity and

beyond postmodernity Similar to other social sciences organization and management studies in the Anglo American and European academy became impressed by the styles of postmodernism and their epistemological companions poststructuralisms during the 1980s For this collection we have selected twenty two journal articles published between 1985 and 1996 that we consider emblematic of postmodern endeavours in management thought as they further our understanding of how truth of any paradigmatic persuasion is fashioned through particular discourses and other signifying practices Taken together these articles address the following questions What has the field accomplished through attempts at being postmodern With what consequences And where does the field stand now if it is still already going after the postmodern In our view the postmodern cannot transcend modern management thought it is rather part of it Nevertheless the mere appearance of efforts towards making the field postmodern makes it important to account for them in the history of the field Such is the narrative that we are trying to portray in this volume

Business Management Hannie Badenhorst-Weiss,Tersia Brevis,Mike Cant,2008-02 The world is in a constant state of flux and this influences the operations of every business and organisation Business Management A Contemporary Approach deals with these changes by covering the functions of a business or an organisation and then addressing the contemporary issues that affect them These issues include globalisation corporate entrepreneurship and citizenship credit diversity and HIV AIDS Every student of business and business manager needs to understand the importance of these issues and their influence on the operations of a business Business Management

A Contemporary Approach also highlights the interdependency between the various business functions This interdependency is very important for a business or organisation to operate as a whole *The Game Changer* A. G. Lafley, Ram Charan, 2010-09-03 It is by making innovation an intimate intentional part of the business that A G Lafley the Jack Welch of the 21st century has recently transformed Procter Gamble from a 39 into a 76 billion dollar company that touches more than 3 billion people around the world On the brink of collapse when he joined in 2000 it became a model for growth and innovation In this inspiring and practical book Lafley explains how making innovation more than just a stand alone activity enabled him to turn around growth productivity and the bottom line As this book shows innovation can become a reliable and repeatable game changer for any business in all areas of the organisation from the CEO s desk to the everyday activities of each employee By using new insights and easy to relate to stories from P G and other companies describing for example the best way to brainstorm and the innovation portfolio this book is destined to become as influential as Good to Great and as Charan s own bestseller Execution *Cultural Science* John Hartley, Jason Potts, 2014-09-25 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Cultural Science introduces a new way of thinking about culture Adopting an evolutionary and systems approach the authors argue that culture is the population wide source of newness and innovation it faces the future not the past Its chief characteristic is the formation of groups or demes organised and productive subpopulation demos Demes are the means for creating distributing and growing knowledge However such groups are competitive and knowledge systems are adversarial Starting from a rereading of Darwinian evolutionary theory the book utilises multidisciplinary resources Raymond Williams s culture is ordinary approach evolutionary science e g Mark Pagel and Herbert Gintis semiotics Yuri Lotman and economic theory from Schumpeter to McCloskey Successive chapters argue that Culture and knowledge need to be understood from an externalist linked brains perspective rather than through the lens of individual behaviour Demes are created by culture especially storytelling which in turn constitutes both politics and economics The clash of systems including demes is productive of newness meaningfulness and successful reproduction of culture Contemporary urban culture and citizenship can best be explained by investigating how culture is used and how newness and innovation emerge from unstable and contested boundaries between different meaning systems The evolution of culture is a process of technologically enabled demic concentration of knowledge across overlapping meaning systems or semiospheres a process where the number of demes accessible to any individual has increased at an accelerating rate resulting in new problems of scale and coordination for cultural science to address The book argues for interdisciplinary consilience linking evolutionary and complexity theory in the natural sciences economics and anthropology in the social sciences and cultural communication and media studies in the humanities and creative arts It describes what is needed for a new modern synthesis for the cultural sciences It combines analytical and historical methods to provide a framework for a general reconceptualisation of the theory of culture one that is

focused not on its political or customary aspects but rather its evolutionary significance as a generator of newness and innovation
