Losing it Robert C. Yeager,1980 **Financialization Of Daily Life** Randy Martin,2002-10-18 While trillions of dollars came and went in the stock market boom of the 1990s the image of every man and woman a CEO may turn out to be the era's lasting legacy Business news once reserved to specialized papers or sections of the larger news of the day came to the forefront in cable television and in cultural images of how ordinary people through the internet and other avenues could not only master their financial life but move money and equity around with the ease of a financial titan Financialization of Daily Life looks at how this transformation occurred and how it is just now becoming a significant and troubling aspect of our political and cultural life Randy Martin takes us through all of the aspects of our financialization He examines how the shift in economic life arose not only from changes in culture but also from new policy priorities that emphasize controlling inflation over promoting growth He offers a close reading of self help literature that teaches parents how to rear financially literate children and to instruct adults in the fundamentals of fiscal management He examines just what a society that treats financial investment as a national past time really looks like and how that society is transforming the world In a country rocked by scandals in accounting and banking the identification ordinary citizens make with and the risk with which they engage in the stock market calls into question the very basis of our economic system Randy Martin spells out in clear terms the implications our financial doings and undoing have for the way we organize our lives and especially our money **How the**

and Sovereign Free Economies and the Demise of the Western Democracies Robert J. Bunker,Pamela Ligouri Bunker,2014-09-15 Much has been written about the many economic benefits of globalization and the triumph and spread of democratic liberalism with the end of the Cold War following the demise of the Soviet Union This work takes issue with such wine and roses perspectives about the future of the Western democracies and their faith based views on the moral purity of a globalized marketplace It also questions many of the assumptions found in the status quo reinforcing discipline of international political economy IPE a discipline that focuses on the formal and legitimate economies and the fa ade they present that international relations and commerce is still dominated and dictated solely by the old Westphalian state centric system Having highlighted these concerns this book looks at two major themes The first theme focuses on the theoretical perception that a Dark Renaissance is taking place globally one in which the Western liberal democracies and its citizens are ill prepared to respond because it exists at the trans civilization level bridging the modern to the post modern world The second theme focuses on the actual process of state deconstruction that is taking place This process is leading to what may become the very undoing of the democracies Drawing together experts from a variety of backgrounds this work explores the increasing shift away from formal based capitalism and evaluates through case studies how different states are responding to the challenges they face This work will be of great interest to students and scholars of international political economy

response of the middle classes to the financial crisis of 2008 is a central theme in the political systems of most developed

Western countries This book approaches middle class politics from a historical perspective looking at its progression since the early 1900s The middle classes contributed significantly and in various ways to the evolution of mass politics in the West with middle class intellectuals oriented to social and political reform such as Leonard Hobhouse Herbert Croly and Leon Bourgeois influencing the setup of politics and the building of institutions in the early 20th century and with lower middle class disaffection fuelling protest politics in the 1890s and 1900s The rise of Fascism in the interwar period owed much to the perception of liquidation permeating the middle classes in the 1920s and the 1930s as a result of post World War I hardship and the Crash of 1929 31 Conversely mass affluence during the trente glorieuses was the result of the post World War II growth strategies adopted by conservatives and social democrats alike The rise of Thatcherism led to the emergence of a more consumerist and market oriented middle class that enjoyed a high living standard but was subjected simultaneously to the turbulences of globalization and the fluctuations of the markets Political realignments that are currently taking shape after the Crash of 2008 are related to the loss of status and purchasing power of the vast middle class formed during the postwar years It is also of historical significance to compare various middle class responses in the 2010s to those to the Crash of the 1920s and 1930s Although authoritarianism and Fascism were the ultimate outcomes of interwar politics there were and still are viable democratic and socially inclusive alternatives *Viereck's*,1917
