Martin,Richard G. Klein,2022-01-04 What caused the extinction of so many animals at or near the end of the Pleistocene Was it overkill by human hunters the result of a major climatic change or was it just a part of some massive evolutionary turnover Questions such as these have plagued scientists for over one hundred years and are still being heatedly debated today Quaternary Extinctions presents the latest and most comprehensive examination of these questions Geological Magazine May be regarded as a kind of standard encyclopedia for Pleistocene vertebrate paleontology for years to come American Scientist Should be read by paleobiologists biologists wildlife managers ecologists archeologists and anyone concerned about the

ongoing extinction of plants and animals Science Uncommonly readable and varied for watchers of paleontology and the rise of humankind Scientific American Represents a quantum leap in our knowledge of Pleistocene and Holocene palaeobiology Many volumes on our bookshelves are destined to gather dust rather than attention But not this one Nature Two strong impressions prevail when first looking into this epic compendium One is the judicious balance of views that range over the whole continuum between monocausal cultural or environmental explanations The second is that both the data base and theoretical sophistication of the protagonists in the debate have improved by a quantum leap since 1967 American Anthropologist Green Equilibrium Christopher Wills,2013-03-28 In Green Equilibrium Christopher Wills explains the rules by which ecosystems maintain a diversity of interdependent species in particular the balance of predators and prey Wills is both an eminent academic and a hugely experienced field biologist In presenting the concept of green equilibrium he draws on a fascinating range of examples including coral reefs off the densely populated Philippines the isolated and densely forested valleys of Papua New Guinea the changing Himalayan kingdom of Bhutan and a Californian ranch being allowed to return to a wild state In each case he assesses the impact of modern changes and attempts at conservation on these delicately balanced ecosystems Wills shows how human populations too are an integral part of the picture We now know from genetic evidence that over the course of history as humans spread out of Africa populations adapted as a result of environmental conditions Striking new evidence indicates that some human populations carry genes from past encounters with other hominids Neanderthals and Denisovans as well as genetic adaptations to local hazards such as malaria Wills argues that the most effective approaches to conserving green equilibria come out of evolutionary insights and from close involvement of the local communities who have lived and adapted to them **The Gnu's World** Richard Estes,2014-04-12 This is the first scholarly book on the antelope that dominates the savanna ecosystems of eastern and southern Africa It presents a synthesis of research conducted over a span of fifty years mainly on the wildebeest in the Ngorongoro and Serengeti ecosystems where eighty percent of the world's wildebeest population lives Wildebeest and other grazing mammals drive the ecology and evolution of the savanna ecosystem Richard D Estes describes this process and also details the wildebeest's life history focusing on its social organization and unique reproductive system which are adapted to the animal's epic annual migrations He also examines conservation issues that affect wildebeest including range wide population declines Ione's dream, and other poems Jane Emily Herbert,1853 *BEYOND MALAISE* Ika Xiao,2025-07-04 Are narcissists humans Is homosexuality natural Is the mask of gender avoidable Is physical disability the disability of an individual What is sex What is body What is love *Thinking Through Style* Michael Dominic Hurley,Marcus Waithe,2018 What is style and how does it relate to thought in language It has often been treated as something merely linguistic independent of thought ornamental stylishness for its own sake Or else it has been said to subserve thought by mimicking delineating or heightening ideas that are already expressed in the words This ambitious and timely book explores a third

more radical possibility in which style operates as a verbal mode of thinking through Rather than figure thought as primary and pre verbal and language as a secondary delivery system style is conceived here as having the capacity to clarify or generate thinking The book s generic focus is on non fiction prose and it looks across the long nineteenth century Leading scholars survey twenty authors to show where writers who have gained reputations as either stylists or as thinkers exploit the interplay between the what and the how of their prose The study demonstrates how celebrated stylists might after all have thoughts worth attending to and that distinguished thinkers might be enriched for us if we paid more due to their style More than reversing the conventional categories this innovative volume shows how style and thinking can be approached as a shared concern At a moment when especially in nineteenth century studies interest in style is re emerging this book reevaluates some of the most influential figures of that age re imagining the possible alliances interplays and generative tensions between thinking thinkers style and stylists

When the Last Lion Roars Sara Evans,2018-06-14 The illegal killing of Cecil a famous and magnificent black maned Zimbabwean lion by an American big game hunter in 2015 sparked international outrage More significantly it drew the world s attention to the devastating plight of Africa s lions A century ago there were more than 200 000 wild lions living in Africa Today with that population reduced by more than 90 per cent many experts believe that without effective conservation plans Africa s remaining wild lions could be completely wiped out by the mid half of this century When the Last Lion Roars explores the historic rise and fall of the lion as a global species and examines the reasons behind its catastrophic decline Interwoven with vivid personal encounters of Africa s last lions Sara Evans questions what is being done to reverse or at least stem this population collapse and she considers the importance of human responsibility in this decline and more crucially in their conservation From the Lion Guardians in Kenya to the Living Walls of Tanzania and the Hwange Lion Research Project in Zimbabwe Sara meets both lions and their champions people who are fighting to bring this iconic species back from the brink of extinction

The Body is Sacred Volume I Ladie Baltimore,2021-03-15 Hey my name is Arie Leach and I want to take you down a timeline We are going on a journey from the late eighties into the nineties This timeline is my perception of what happened to my family friends and me when the crack epidemic hit Baltimore City The timeframe parallels the corner boys and the wiretap phenomenon This

experience is based on a true story and the first of a series So let s sit down as friends while I narrate my story The Insurmountable Darkness of Love Douglas E. Christie,2022 This book is a reflection on the meaning of spiritual darkness especially those difficult places in human experience where meaning seems to elude us where we are emptied out and are compelled to dig deeper into who we truly are Douglas E Christie takes up this facet of experience in ordinary human experience but also in relation to the Christian contemplative and mystical traditions where such experience is often understood to be both painful and transformative allowing the mind and heart to open in love City at World's End Edmond Hamilton,2017-12-02 The pleasant little American city of Middletown is the first target in an atomic war but instead of blowing Middletown to smithereens the super hydrogen bomb blows it right off the map to somewhere else First there is the new thin coldness of the air the blazing corona and dullness of the sun the visibility of the stars in high daylight Then comes the inhabitant s terrifying discovery that Middletown is a twentieth century oasis of paved streets and houses in a desolate brown world without trees without water apparently without life in the unimaginably far distant future **Library of the World's Best Literature: Songs, hymn and lyrics** Charles Dudley Warner,Hamilton Wright Mabie,Lucia Isabella Gilbert Runkle,George H.
