Modern Processing Packaging And Distribution Systems For Food:

Modern Processing, Packaging and Distribution Systems for Food Frank A. Paine, 2012-12-06 The progress that has been made over the last decade in the preparation development processing and marketing of food has to a large extent been made possible by innovations and developments in the ways that thermo plastics in conjunction with paper metal foils adhesives and other materials have been combined and formed into the appropriate configurations to provide the properties required Much has been said written and published about retort pouches modified atmosphere packaging and aseptic preservation processes and even more about the newer methods of distribution and retailing of all kinds of food However all of this material needed to be digested condensed into a logical framework and appraised and possible further developments considered In many instances the original research and development was carried out in conjunction with one or more of the research organisations in membership with IAPRI the International Association of Packaging Research Institutes and it was felt that a book which attempted to provide a review of the more important developments would be useful to practitioner and student alike

Modern Processing Packaging and Distribution Systems for Food Frank A Paine, 1995-12-31 A Handbook of Food Packaging Frank A. Paine, Heather Y. Paine, 2012-12-06 This is the second edition of a successful title first published in 1983 and now therefore a decade out of date The authors consider the development of the right package for a particular food in a particular market from the point of view of the food technologist the packaging engineer and those concerned with marketing While the original format has been retained the contents have been thoroughly revised to take account of the considerable advances made in recent years in the techniques of food processing packaging and distribution While efficient packaging is even more a necessity for every kind of food whether fresh or processed and is an essential link between the food producer and the consumer the emphasis on its several functions has changed Its basic function is to identify the product and ensure that it travels safely through the distribution system to the consumer Packaging designed and constructed solely for this purpose adds little or nothing to the value of the product merely preserving form or processor freshness or preventing physical damage and cost effectiveness is the sole criterion for success If however the packaging facilitates the use of the product is reusable or has an after use some extra value can be added to justify the extra cost and promote sales Many examples of packaging providing such extra value can be cited over the last decade Processing and Packaging Heat Preserved Foods J.A.G. The Packaging User's Handbook Frank A. Paine, 2012-12-06 The first version of this book Packaging Materials and Containers was published in 1967 and was revised extensively ten years later under the title The Packaging Media Some thirty or so authors were involved in producing the initial texts for these books and I must acknowledge their material much of which is still valid It is now thirteen years since The Packaging Media high time to take stock and incorporate the considerable advances in materials forms techniques and machinery that have taken place In 1977 wherever possible we asked the original authors to carry out the revisions but retirements and job changes have now eliminated over twenty of the original authors We have therefore appointed an Editorial Board to advise on this more extensive revision and I wish to thank them for their detailed

and helpful assistance Dr C J Mackson and Professor Y Dagel for general comments and guidance on the overall plan and in particular the Introduction chapter 1 Graham Gordon and Harri Mostyn for assistance with much of Part D on Distribution Packages and Dennis Hine and Susan Selke for their work in respect of paperboard and plastics retail packaging respectively A major contribution was made by the seventh member of the Editorial Board David Osborne who advised in the area of glass

Technology of Reduced-Additive Foods Jim Smith, 2012-12-06 The food industry for many years reacted to consumer demand for more appealing and convenient food products by using additives More recently the demands of consumers have grown to include still higher performance products but with less additives The industry has responded accordingly There are often significant scientific and technical obstacles to be overcome to make a product with less additives It is these technical challenges that this book is intended to address The approach taken in this book is to examine specific aspects of the industry where important contributions are being made to avoid or reduce additive use or to create new natural and more acceptable additives which can replace the old ones There is a tremendous amount of work underway in this field and to cover it comprehensively would fill many volumes This volume addresses the areas where there has been a considerable amount of recent activity and published results Chapter 1 covers starter cultures in dairy products meat products and bread The author is Professor Gunnar Mogensen the Director of Research and Development for Chr Hansen's Laboratorium the foremost suppliers of starter cultures in the world He examines developments in starter culture technology and illustrates ways in which starter cultures are replacing traditional additives in foods
