The Making of Intellectual Property Law in Vietnam Tran Kien, 2025-09-03 This book is about the making of intellectual property law in Vietnam across colonial and socialist space and time from 1864 to 1994 It provides a completely new provoking narrative disproving previously published scholarship which claimed that there was no intellectual property law in Vietnam during the colonial and socialist periods In doing so the book engages with an emerging field of historiographical inquiry into the intellectual property law history in Vietnam and worldwide which investigates how and why the scholarship about the history of intellectual property law has been construed and framed as such within a specific period and space This book is comprised of three knowledge components The first involves the reconstruction of the lost intellectual property law from 1864 to 1994 in Vietnam doctrinally Relying on newly discovered archives in Vietnam and worldwide it unravels a corpus of statutory and regulatory provisions and interesting at times contradictory juridical decisions that governed and interpreted copyright patent and trademark The second is the historiographical inquiry of the making of the intellectual property law history scholarship in Vietnam This will answer the questions of how and why the particular histories had been construed and framed as such at a particular time This involves the debate about sociopolitical ideologies underlying the meaning and application of the laws most notably colonialism and socialism Finally the third engages with the theory of legal transplantation It addresses a hypothetical question of colonial laboratory as a form of legal transplantation a new concept that this book offers to the global scholarship It demonstrates that the colonial empire had tried to use Vietnam as a laboratory for its legal reform and then transplanted the successful and feasible results back to the empire This book explains the distinctively ideological principles underlying the understanding and application of the law

Obligations in Roman Law Thomas McGinn, 2013-01-23 Long a major element of classical studies the examination of the laws of the ancient Romans has gained momentum in recent years as interdisciplinary work in legal studies has spread Two resulting issues have arisen on one hand concerning Roman laws as intellectual achievements

and historical artifacts and on the other about how we should consequently conceptualize Roman law Drawn from a conference convened by the volume s editor at the American Academy in Rome addressing these concerns and others this volume investigates in detail the Roman law of obligations a subset of private law together with its subordinate fields contracts and delicts torts A centuries old and highly influential discipline Roman law has traditionally been studied in the context of law schools rather than humanities faculties This book opens a window on that world Roman law despite intense interest in the United States and elsewhere in the English speaking world remains largely a continental European enterprise in terms of scholarly publications and access to such publications This volume offers a collection of specialist essays by leading scholars Nikolaus Benke Cosimo Cascione Maria Floriana Cursi Paul du Plessis Roberto Fiori Dennis Kehoe Carla Masi Doria Ernest Metzger Federico Procchi J Michael Rainer Salvo Randazzo and Bernard Stolte many of whom have not published before in English as well as opening and concluding chapters by editor Thomas A J McGinn

Strata Title Property Rights Cathy Sherry, 2016-12-19 Multi owned properties make up an ever increasing proportion of commercial tourist and residential development in both urban and rural landscapes around the world This book critically analyses the legal social and economic complexities of strata or community title schemes At a time when countries such as Australia and the United States turn ever larger areas into strata title condominiums and community title homeowner associations this book shows how governments the judiciary and citizens need to better understand the ramifications of these private communities Whilst most strata title analysis has been technical focusing on specific sections of legislation this book provides higher level analysis discussing the wider economic social and political implications of Australia s strata and community title law In particular the book argues that private by laws however desirable to initial parties are often economically inefficient and socially regressive when enforced against an ever changing group of owners The book will be of particular interest to scholars and legal practitioners of property law in Australia but as the Australian strata title model has formed the basis for legislation in many countries the book draws out lessons and analysis that will be of use to those studying privately owned communities across the world
