**Redesigning the US Mental Health Care System** Sydney S. Harris, Stephen M. Strakowski, 2024 What is commonly referred to in the U S as the mental health care system is not really a system at all While excellent programs exist in every state in every community across America the system is actually a set of fragmented services provided inequitably by a haphazard array of specialty providers often with inadequate resources and only tenuously connected to health care systems for other health needs Crisis is too often the first point of contact for people experiencing a mental illness while year over year increases in rates of anxiety depression traumatic stress and death from suicide and overdose have led many to characterize the current situation as a pandemic or epidemic of mental illness constituting a national emergency For youth and young adults in late 2021 this emergency was formally recognized by the U S Surgeon General in the first Advisory ever issued regarding the nation s mental health

**Normal and Abnormal Behavior in Chinese Culture** A. Kleinman, T.Y. Lin, 2013-06-29 Our purpose in assembling the papers in this collection is to introduce readers to studies of normal and abnormal behavior in Chinese culture We want to offer a sense of what psychiatrists and social scientists are doing to advance our understanding of this subject including what findings are being made what questions researched what conundrums worried over Since our fund of knowledge is obviously incomplete we want our readers to be aware of the limits to what we know and to our acquisition of new knowledge Although the subject is too vast and uncharted to support a comprehensive synthesis in a few areas e g psychiatric epidemiology enough is known for us to be able to present major reviews The chapters themselves cover a variety of themes that we regard as both intrinsically interesting and deserving of more systematic evaluation Many of the issues they address we believe to be valid concerns for comparative cross cultural studies No attempt is made to artificially integrate these chapters since the editors wish to highlight their distinctive interpretive frameworks as evidence of the rich variety of approaches that scholars take to this subject We see this volume as a modest and self consciously limited exploration Here are some accounts and interpretations but by no means all of normal and abnormal behavior in the context of Chinese culture that we believe fashion a more discriminating understanding of at least a few important aspects of that subject

Health and Health Care in Developing Countries Peter Conrad, Eugene B. Gallagher, 2011 The volume covers a range of areas central Africa Nigeria Singapore Taiwan Indonesia Nepal China United Arab Emirates Oman and Mexico and a broad scope of topics from emergency care the AIDS epidemic and women's health care to public health programs and national health care policies Contributors address the central question of whether health systems in developing areas should emphasize the role of clinical medicine and individual physicians or community and preventive medical resources The major health problems faced by these societies inadequate sanitation infectious disease high infant child mortality and a lack of family planning indicate the greater need for health educators and public health workers despite many poor nations desire for Western doctors Other topics that are examined include the process of seeking medical aid the relationship between traditional and modern medicines medical education hospital care and communication between doctors and patients in developing countries and the relevance and application of sociology in Third World settings This volume seeks to draw attention to the significance of medical sociology for understanding Third World health problems and to show how examining developing societies may necessitate reframing or modifying some Western sociological notions

From Asylum to Community Gerald N. Grob, 2014-07-14 The distinguished historian of medicine Gerald Grob analyzes the post World War II policy shift that moved many severely mentally ill patients from large state hospitals to nursing homes families and subsidized hotel rooms and also most disastrously to the streets On the eve of

the war public mental hospitals were the chief element in the American mental health system Responsible for providing both treatment and care and supported by major portions of state budgets they employed more than two thirds of the members of the American Psychiatric Association and cared for nearly 98 percent of all institutionalized patients This study shows how the consensus for such a program vanished creating social problems that tragically intensified the sometimes unavoidable devastation of mental illness Examining changes in mental health care between 1940 and 1970 Grob shows that community psychiatric and psychological services grew rapidly while new treatments enabled many patients to lead normal lives Acute services for the severely ill were expanded and public hospitals relieved of caring for large numbers of chronic or aged patients developed into more active treatment centers But since the main goal of the new policies was to serve a broad population many of the most seriously ill were set adrift without even the basic necessities of life By revealing the sources of the euphemistically designated policy of community care Grob points to sorely needed alternatives Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905      *Department of Labor-Federal Security Agency Appropriations for 1953* United States.
