The Prophecy Collection: The End Times Survival Guide, the Coming Apostasy, Russia Rising Mark

Hitchcock, 2021-10 Three popular books now collected for the first time in one special edition We live in a world that seems to be on the verge of coming apart Shootings Killer viruses The threat of nuclear war All of it is just too real What is happening in our world today is moving Christians to return to the foundations of our spiritual existence Believers everywhere must get back to what matters most We must always remember our battle at its most basic level is spiritual In The Prophecy Collection popular Bible teacher Mark Hitchcock helps you discover spiritual insight and spiritual tools to understand what's happening and to prepare for the future through three important works The End Times Survival Guide The Coming Apostasy coauthored with Jeff Kinley Russia Rising As we prepare for the Lord's coming it's time to understand the biblical truths you need to know in order to face an increasingly decaying darkening world No matter what the future holds anchor your spiritual health and welfare on the immovable rock of God's Word Modernity, Domesticity and Temporality in Russia Rebecca Friedman, 2020-07-09 Revolution war dislocation famine and rivers of blood these traumas dominated everyday life at turn of the century Russia As Modernity Domesticity and Temporality in Russia explains amidst such public turmoil Russians turned inwards embracing and carefully curating the home in an effort to express both personal and national identities From the nostalgic landed estate with its backward gaze to the present focused and efficient urban apartment to the utopian communal dreams of a Soviet future the idea of time was deeply embedded in Russian domestic life Rebecca Friedman is the first to weave together these twin concepts of time and space in relation to Russian culture and in doing so this book reveals how the revolutionary domestic experiments reflected a desire by the state and by individuals to control the rapidly changing landscape of modern Russia Drawing on extensive popular and literary sources both visual and textual this fascinating book enables readers to understand the reshaping of Russian space and time as part of a larger revolutionary drive to eradicate however ambivalently the 19th century gentrified sloth in favour of the proficient Soviet comrade **The Struggle for the West** Christopher Browning, Marko Lehti, 2009-09-29 In recent years debates about the nature and future of the West have been high on the political agenda Prognoses of the West's imminent demise have been countered by those arguing for its continued relevance or those arguing that while the West will survive its nature and the balance of power between its constituent units is transforming This book argues that understanding contemporary developments requires subjecting the very idea of the West to critical scrutiny and in particular asking what kind of concept it actually is Locating the West as a discursive concept the book argues attempts to save fix or reclaim the meaning of the West are illustrative of political agendas rather than indicative of accurate claims about the essential nature of the West In contrast the book argues that as a concept the West is impregnated with various discursive legacies the most embedded of which are those of a civilisational modern and political West However while attempts to define the West's essence are

therefore doomed to fail given the concept's historical and discursive flexibility such attempts reaffirm the legitimising role which claims to the West continue to perform Beyond this the book challenges traditional genealogies of the West which overwhelmingly depict the West as an inside out concept In contrast the book argues that historically outsiders have played an important role in defining the nature of the West and constituting it as a political subject processes that remain evident today This book will particularly interest students of critical security studies critical geopolitics European politics American politics and IR theory

Myth Making in the Soviet Union and Modern Russia Vicky Davis, 2017-11-30 The 1943 battle to free the Soviet Black Sea port of Novorossiisk from German occupation was fought from the beach head of Malaia zemlia where the young Colonel Leonid Brezhnev saw action Despite widespread scepticism of the state's appropriation and inflation of this historical event the heroes of the campaign are still commemorated in Novorossiisk today by an amalgam of memoir monuments and ritual Through the prism of this provincial Russian town Vicky Davis sheds light on the character of Brezhnev as perceived by his people and on the process of memory for the ordinary Russian citizen Davis analyses the construction and propagation of the local war myth to link the individual citizens of Novorossiisk with evolving state policy since World War II and examines the resultant social and political connotations Her compelling new interdisciplinary evidence reveals the complexity of myth and memory challenging existing assumptions to show that there is still scope for the local community and even the individual in memory construction in an authoritarian environment This book represents a much needed departure from the study of myth and memory in larger cities of the former Soviet Union adding nuance to the existing portrait of Brezhnev and demonstrating the continued importance of war memory in Russia today

Before Command Paul R. Gregory, 2014-07-14 In a work with significant implications for present day economic reform in the Soviet Union Paul Gregory examines Russian and Soviet economic history prior to the installation of the administrative command system By drawing on basic economic statistics from 1861 to the 1930s Gregory's revisionist account debunks a number of myths promulgated by historians in both the East and the West He demonstrates that the Russian economy under the tsars performed much better than has previously been supposed the Russian economy and its financial institutions were

integrated into the world economy allowing Russia to attract significant foreign capital Furthermore he shows that Stalin's justifications for the abandonment of the New Economic Policy in the late 1920s were incorrect the so called crises of NEP were either fabricated or the result of misguided economic thinking Before Command is the culmination of the author's lifelong study of the economic history of Russia and the Soviet Union In convincing detail it describes little known Russian and Soviet successes with market capitalism while it also shows the problems inherent in a mixed system such as the NEP which seeks to combine very strong elements of command with market resource allocation Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
