Impact of Information Technology on Battle Command George E. Dodge,1998 The possible effects of information technology insertion on organizations and their personnel are derived from an analysis of published management science and business literature Two major points are developed First many factors other than the technical potential of a given information technology interact with one another and with the technology itself to determine the resultant nature form and functionality of the digitized organization Second the most significant impact on commanders and their staffs for the foreseeable future will not be quantum improvements in operational performance made possible by information technology but rather the technology insertion process itself Based on this analysis we propose that implications for command in a digitized environment can be best described by reference to a continuum of organizational structures and associated behaviors The extremes of this continuum are defined as digital mechanistic and digital organic A third point between these two extremes is defined as digital adaptive We discuss the nature of command over the range of the proposed continuum The new competencies that might be required of commanders and their staffs regardless of the outcome of the technology insertion process are then discussed The chapter concludes with suggestions for improving the

technology insertion process DTIC
