The Spirit of Modern Criticism Charles Maxwell Drennan, 1922 **Report of the commissioners** Schools inquiry commission, 1868 **Transnationalism and Translation in Modern Chinese, English, French and Japanese Literatures** Ryan Johnson, 2020-12-15 The theory of literary worlds has become increasingly important in comparative and world literatures But how are the often contradictory elements of Eastern and Western literatures to cohere in the new worlds such contact creates Drawing on the latest work in philosophical logic and analytic Asian philosophy this monograph proposes a new model of literary worlds that is best suited to comparative literature dealing with Western and East Asian traditions Unlike much discussion of world literature anchored in North American traditions featured here is the transnational work of artists philosophers and poets writing in English French Japanese and Mandarin in the twentieth century Rather than imposing sharp borders this book suggests that vague boundaries link Eastern and Western literary works and traditions and that degrees of distance can better help us to see the multiple dimensions that both distinguish and join together literary worlds East and West As such it enables us to grasp not only how East Asian and Western writers translate one another's works into their own languages and traditions but also how modern writers East and West modify their own traditions in order to make them fit in the new constellation of literary worlds brought about by the complex flow of literary information across twentieth century Eurasia *Modern Languages* Eric G. speaking about the lessons learned over the course of a career in translation. As these essays make clear, translators work in the space between languages and in so doing provide insights into the ways in which a culture makes the world verbal. From publisher's description

Translating Ancient Greek Drama in Early Modern Europe Malika Bastin-Hammou, Giovanna Di Martino, Cécile Dudouyt, Lucy C. M. M. Jackson, 2023-05-22

The volume brings together contributions on 15th and 16th century translation throughout Europe in particular Italy France Spain Portugal Germany and England. Whilst studies of the reception of ancient Greek drama in this period have generally focused on one national tradition, this book widens the geographical and linguistic scope so as to approach it as a European phenomenon. Latin translations are particularly emblematic of this broader scope: translators from all over Europe latinised Greek drama and as they did so developed networks of translators and practices of translation that could transcend national borders. The chapters collected here demonstrate that translation theory and practice did not develop in national isolation but were part of a larger European phenomenon nourished by common references to Biblical and Greco-Roman antiquities and honed by common religious and scholarly controversies. In addition to situating these texts in the wider context of the reception of Greek drama in the early modern period, this volume opens avenues for theoretical debate about translation practices and discourses on translation and on how they map on to twenty-first century terminology.
