Subcommittee on Public Lands and Resources, 1978 *The Western Range Revisited* Debra L. Donahue, 1999 Livestock grazing is the most widespread commercial use of federal public lands The image of a herd grazing on Bureau of Land Management or U S Forest Service lands is so traditional that many view this use as central to the history and culture of the West Yet the grazing program costs far more to administer than it generates in revenues and grazing affects all other uses of public lands causing potentially irreversible damage to native wildlife and vegetation The Western Range Revisited proposes a landscape level strategy for conserving native biological diversity on federal rangelands a strategy based chiefly on removing livestock from large tracts of arid BLM lands in ten western states Arizona California Colorado Idaho Nevada New Mexico Oregon Utah Washington Wyoming Drawing from range ecology conservation biology law and economics Debra L Donahue examines the history of federal grazing policy and the current debate on federal multiple use sustained yield policies and changing priorities for our public lands Donahue a lawyer and wildlife biologist uses existing laws and regulations historical documents economic statistics and current scientific thinking to make a strong case for a land management strategy that has been until now unthinkable A groundbreaking interdisciplinary work The Western Range Revisited demonstrates that conserving biodiversity by eliminating or reducing livestock grazing makes economic sense is ecologically expedient and can be achieved under current law **Public Land Laws** United States. Van Atta, 2014-05-01 A close look at westward expansion federal lands and American destiny in the early republic Few issues defined the period between American independence and the Mexican War more sharply than westward settlement and the role of the federal government in that expansion In *Securing the West* John R Van Atta examines the visions of the founding generation and the increasing influence of ideological differences in the years after the peace of 1815 Americans expected the country to grow westward but on the details of that growth they held strongly different opinions What part should

Congress play in this development How much should public land cost What of the families and businesses left behind and how would society's institutions be established in the West What of the premature settlers the squatters who challenged the rule of law while epitomizing democratic daring Taking a broad approach Van Atta addresses three interrelated queries First how did competing economic beliefs and divergent cultural mandates influence the various outcomes of this broad debate over the means timing and purposes of settling the trans Appalachian West Second what alternative visions of western society lay behind the battles among policy makers within the government and the interested parties who would sway them Third why did settlement of the West take such a different course in the end from that which the earliest leaders of the republic intended This story explores dimensions of the federal lands question that other historians have minimized or left out entirely Van Atta draws upon a range of sources known to have influenced the public discourse including congressional debates committee reports and correspondence editorial writings by the famous and unknown and news coverage in various widely circulated newspapers and magazines of the period Much of the attention focuses on Congress the elected leaders who advocated divergent plans about western lands In Congress more than any other place public leaders articulated basic concerns about the character structure direction and destiny of society in the early United States By 1830 many other important national concerns had become critically entangled with land disposition creating points of ideological tension among rival regions parties and interests in the early years of the republic particularly in Jacksonian America

Stability and Change in Modern Property Law Ernesto Vargas Weil, 2025-09-04 This book examines the English and German version of the numerus clausus principle which holds that there is a closed list of permitted property rights It challenges recent views that the principle renders property law inflexible and unable to accommodate social and economic changes Relying on a novel approach combining property theory and comparative research of English and German law it argues that the restrictions the principle imposes on the creation of new property types actually does accommodate social changes through a process of functional transformation of the existing property rights This is a fascinating unique study that makes a rigorous original contribution to property law theory

Land Law Elizabeth Cooke, 2020-09-11 A clear and concise introduction to the land law of England and Wales written in the Clarendon style as a letter to a friend with a minimum of footnotes and statutory material It explains the origins of land law in the feudal system its transformation by the legislation of 1925 and the modern regime in which registration is the key to the validity and enforceability of interests in land Elizabeth Cooke introduces the building blocks of land law namely property rights in land and explains how they have evolved by a mixture of design and accident The book explores the unique role of the trust in English law and the many complications that can arise where ownership of land is shared whether concurrently or consecutively Throughout the book the themes of management of complexity in land law and the tension between dynamic

and static security are examined The law of mortgages leases easements and covenants is explained The third edition has been updated with important developments in land law including recent decisions of the Court of Appeal and the Supreme Court and reform proposals by the Law Commission Written in an accessible style this book is an essential read for all those coming to the subject for the first time Journal of the Society of Public Teachers of Law ,1927 Greening NAFTA David L.
